

Mark schemes

1. B

[1]

2. D

[1]

3. **Areas for discussion include:**

- UK unemployment and how it is measured
- different causes of UK unemployment
- nature of supply-side policies, interventionist v free-market policies
- supply-side policies and the natural rate of unemployment
- the impact of different supply-side policies on unemployment, eg reducing the replacement ratio, measures to improve labour mobility, reductions in corporation tax
- supply-side policies and real wage unemployment
- supply-side policies and long-term unemployment, eg when there is significant structural change, the problem of hysteresis
- relating supply-side policies to unemployment in the UK
- problems and limitations of supply-side policies as a means of reducing unemployment, eg impact on the budget deficit, time lags, effectiveness, government failure
- the benefits of using supply-side policies to reduce unemployment
- demand-side policies as a way of reducing unemployment, ie expansionary monetary and fiscal policy
- exchange-rate policy as a means of reducing unemployment
- benefits and limitations of demand-side policies
- potential conflicts with other policy objectives and ways of reconciling these conflicts
- circumstances when demand-side and/or supply-side policies are most appropriate
- issues relating to equity, inequality and poverty.

The use of relevant diagrams to support the analysis should be taken into account when assessing the quality of the candidate's response to the question.

[25]

4. **Areas for discussion include:**

- economic growth
- short-run growth versus long-run growth
- determinants of long-run trend rate of growth
- supply-side policies
- fiscal policy and its influence on the supply side of the economy
- advantages and disadvantages of various supply-side policies
- the role of monetary policy in helping to increase the long-run rate of growth
- the importance of confidence/uncertainty

- 
- demand-side factors affecting long-run growth
 - supply-side factors affecting growth
 - consideration of the amount of spare capacity within the economy
 - the role of the private sector in helping to achieve economic growth
 - multiplier/accelerator effects
 - consideration of the economic cycle
 - consideration of limitations, such as import taxes, Brexit, the size of the budget deficit
 - the importance of external influences, such as 'the global slowdown'
 - consideration of the context of the UK economy, such as 'a decade of prosperity and opportunity'.

The use of relevant diagrams to support the analysis should be taken into account when assessing the quality of the candidate's response to the question.

EXAM PAPERS PRACTICE
© 2025 Exam Papers Practice. All Rights Reserved

Level of response	Response	Max 25 marks
5	Sound, focused analysis and well-supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes good application of relevant economic principles to the given context and, where appropriate, good use of data to support the response - includes well-focused analysis with clear, logical chains of reasoning - includes supported evaluation throughout the response and in a final conclusion.	21–25 marks
4	Sound, focused analysis and some supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes some good application of relevant economic principles to the given context and, where appropriate, some good use of data to support the response - includes some well-focused analysis with clear, logical chains of reasoning - includes some reasonable, supported evaluation.	16–20 marks
3	Some reasonable analysis but generally unsupported evaluation that: - focuses on issues that are relevant to the question, showing satisfactory knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present - includes reasonable application of relevant economic principles to the given context and, where appropriate, some use of data to support the response - includes some reasonable analysis but which might not be adequately developed or becomes confused in places - includes fairly superficial evaluation; there is likely to be some attempt to make relevant judgments but these are not well-supported by arguments and/or data.	11–15 marks
2	A fairly weak response with some understanding that: - includes some limited knowledge and understanding of economic terminology, concepts and principles but some errors are likely - includes some limited application of relevant economic principles to the given context and/or data to the question - includes some limited analysis but it may lack focus and/or become confused - includes attempted evaluation which is weak and unsupported.	6–10 marks
1	A very weak response that: - includes little relevant knowledge and understanding of economic terminology, concepts and principles - includes application to the given context which, at best, is very weak - includes attempted analysis which is weak and unsupported.	1–5 marks

5.

Explanation

For defining / explaining

- Deflation / Inflation
- Malign / Benign deflation
- Methods of measurement (CPI/basket of goods)

Up to 2 marks per definition or explanation to a maximum of 4 marks

Award 1 mark for each step in a logical chain of reasoning:

For example:

The use of supply-side policies **(1 mark)** such as subsidies for research and development **(1 mark)** may lead to the creation of improved efficiency in production techniques **(1 mark)** which may lead to improvements in productivity **(1 mark)** and therefore increase the output per worker **(1 mark)** which may mean fewer workers are needed to produce the same amount of goods **(1 mark)** which will reduce the average unit cost **(1 mark)**. This may be passed on to customers in the form of lower prices **(1 mark)** will lead to a fall in cost-push inflationary pressure **(1 mark)** and potentially benign deflation **(1 mark)**.

Other examples include: Falling oil and other commodity prices, any component of aggregate demand falling for a reason such as high interest rates affecting consumption, lack of confidence reducing investment, increased international competition, government attempts to reduce the budget deficit by spending cuts or recession in the Eurozone damaging exports.

Up to 15 marks

Use of diagrams to help support explanations, e.g. AD falling, SRAS increasing, LRAS increasing

Up to 2 marks per diagram (1 mark for labelling, 1 mark for correct information shown) to a maximum of 4 marks.

Reference to the UK and/or other economies.

1 mark per reference to a maximum of 2 marks

[15]

6.

In this part of the question, candidates will need to demonstrate that they are able to evaluate issues and arguments to support a conclusion if they are to be awarded **more than 15 marks**.

Where there is no **explicit** reference to the data, award a maximum of **21 marks**.

Level 5	Good analysis <u>and</u> good evaluation	22 to 25 marks <i>Mid-Point 24 marks</i>
Level 4	Good analysis <u>but</u> limited evaluation OR Reasonable analysis <u>and</u> reasonable evaluation	17 to 21 <i>Mid-Point 19 marks</i>
Level 3	Reasonable including some correct analysis <u>but</u> very limited evaluation	10 to 16 <i>Mid-Point 13 marks</i>
Level 2	Weak with some understanding	4 to 9 <i>Mid-Point 7 marks</i>
Level 1	Very weak	0 to 3 <i>Mid-Point 2 marks</i>

Introduction	• Unemployment • Demand-side / Supply-side • Types of unemployment
Developing the response to the question: (Application)	Drawing on the information in the extracts: • Labour market reforms (Extract E and Extract F) • EU possibly recovering (Extract E and Extract F) • Supply-side reforms (Extract E) • Effects on firms / workers (Extract E) • Comparisons with other EU countries (Extract E) • The current state of the UK labour market and wage growth (Extract F) • Subsidies / training / introduction of living wage (Extract F) • Benefits cap and limiting JSA (Extract F)
(Analysis)	Arguments as to why demand-side factors may cause further falls: • Rising real incomes in the UK • Increased confidence • Possible increases in domestic investment • Possible increases in FDI • Multiplier effects • Improved export opportunities (if the EU grows) Arguments as to why supply-side factors may cause further falls: • Consideration of the “voluntary” nature of some types of unemployment • Changes to incentives • Changes to benefits forcing people into low paid jobs • Consideration that living wage may actually entice more people into jobs market • So called “carrot and stick” approaches • Changes to structural unemployment • Improvements to mobility (occupational and geographical) • The UK’s experiences under the “Work Programme” and government policy • Focus on particular groups, such as the 16-24 age group or the long term unemployed.
Evaluation	• The UK could be approaching NRU / NAIRU / full capacity, the supply-side may be vital in order to gain further improvements • Both approaches are not mutually exclusive, improvements could be made on both at the same time • Some factors may be beyond the control of the UK, e.g. external demand in the EU, is trade a significant issue? • Consideration of regional aspects – unemployment rates mask a regional issue which is very difficult to solve with policies which aren’t targeted • Consideration that more jobs may be created but the incomes or conditions provided by those jobs maybe are not as good as others <i>Examiners should note that, for some of the weaker or average candidates, parts of the above represent quite sophisticated evaluation and so it is important to ensure that more basic evaluation is adequately rewarded where a genuine effort has been made to display that skill.</i>

Also give credit for

- Reference to the UK / other economies
- Diagrams
- An overall judgement on the issues raised.

It will only be possible for candidates to consider a few of the above. They may also discuss issues not mentioned above.

[25]

7.

In this part of the question, candidates will need to demonstrate that they are able to evaluate issues and arguments to support a conclusion if they are to be awarded **more than 15 marks**.

Level 5	Good analysis <u>and</u> good evaluation	22 to 25 marks <i>Mid-Point 24 marks</i>
Level 4	Good analysis <u>but</u> limited evaluation OR Reasonable analysis <u>and</u> reasonable evaluation	17 to 21 <i>Mid-Point 19 marks</i>
Level 3	Reasonable including some correct analysis <u>but</u> very limited evaluation	10 to 16 <i>Mid-Point 13 marks</i>
Level 2	Weak with some understanding	4 to 9 <i>Mid-Point 7 marks</i>
Level 1	Very weak	0 to 3 <i>Mid-Point 2 marks</i>

Issues and areas for discussion include

Introduction	• Interest rates • Monetary policy • Economic growth (short-run and long-run)
Developing the response to the question: (application and analysis)	Beneficial effects of low interest rates: • Effects of low interest rates on savings, increased consumption and increased growth • Effects of low interest rates on tracker mortgages, increased disposable income and consumption increasing growth • Effects of low interest rates on credit, consumption and growth • Effects of low interest rates on firms and investment • Effects of low interest rates and its effects on currency and trade flows • Benefits to both short-run and long-run growth. Negative effects of low interest rates: • The effect on long-term investment and bank's willingness and ability to lend • The building up of personal debt and future problems • The potential damage that a rise in interest rates may have after such a sustained low rate • The effects on the housing market of inflated volumes of borrowing and other microeconomic arguments • Arguments regarding the long-term damage of sustained low rates. Other causes of economic growth: • Consideration of the other factors leading to economic growth such as fiscal / other monetary or supply-side policies or exogenous factors.
Evaluation	• The effects are difficult to quantify due to the economy never having experienced such persistent low rates • The fact that the bank rate is very different from lending and borrowing rates and therefore the private sector sets many of these rates • The effect of the credit crunch and confidence in determining the level of consumption and investment • The so called "liquidity-trap" (not in specification) and the ineffectiveness of interest rate as they reach low levels • The importance of other factors rather than interest rates in determining growth • Time-lags • Effectiveness of interest rates <i>Examiners should note that, for some of the weaker or average candidates, parts of the above represent quite sophisticated evaluation and so it is important to ensure that more basic evaluation is adequately rewarded where a genuine effort has been made to display that skill.</i>
Also give credit for	• Reference to the UK / other economies • Diagrams • An overall judgement on the issues raised

It will only be possible for candidates to consider a few of the above. They may also discuss other issues not mentioned above.

[25]

8.

In this part of the question, candidates will need to demonstrate that they are able to evaluate issues and arguments to support a conclusion if they are to be awarded **more than 15 marks**.

Level 5	Good analysis <u>and</u> good evaluation	22 to 25 marks <i>Mid-Point 24 marks</i>
Level 4	Good analysis <u>but</u> limited evaluation OR Reasonable analysis <u>and</u> reasonable evaluation	17 to 21 <i>Mid-Point 19 marks</i>
Level 3	Reasonable including some correct analysis <u>but</u> very limited evaluation	10 to 16 <i>Mid-Point 13 marks</i>
Level 2	Weak with some understanding	4 to 9 <i>Mid-Point 7 marks</i>
Level 1	Very weak	0 to 3 <i>Mid-Point 2 marks</i>

Introduction	- Public sector - The UK economy - Macroeconomic performance / living standards
Developing the response to the question: (application and analysis)	Arguments why a smaller public sector may benefit the UK economy: - Crowding-out arguments (both physical and financial) - The role of potentially lower taxes in affecting growth - The role of potentially lower taxes in supply-side policy - The role of potentially lower taxes on private sector employment and the willingness to work - The role of potentially lower taxes on FDI - Deficit reduction and debt repayment - Potential boosts to the private sector of reduced red-tape and effects on recruitment. Arguments why a smaller public sector may be damaging to the UK economy: - An absence of the “crowding in” effect - A lack of public sector employment and negative multiplier effects - Regional effects especially in places reliant upon high levels of public expenditure - The possibility that some unemployment could be structural in nature due to the nature of some public sector jobs - A lack of provision of public services - A lack of correction of market failures - Possible rising inequality.
Evaluation	- Effects may differ depending on income group and stakeholder group depending upon the focus of government policy - The global economy may have a much larger effect for example FDI may not be forthcoming due to global uncertainty - Effects may differ depending on the employment sector (some government spending may be “ring-fenced”) - Other factors which may be more important than the size of the public sector - The degree of requirement for the size of the government may vary with the trade cycle (alternatively it could be argued that this should be irrelevant to the trade cycle). <i>Examiners should note that, for some of the weaker or average candidates, parts of the above represent quite sophisticated evaluation and so it is important to ensure that more basic evaluation is adequately rewarded where a genuine effort has been made to display that skill.</i>
Also give credit for	- Reference to the UK / other economies - Diagrams - An overall judgement on the issues raised

It will only be possible for candidates to consider a few of the above. They may also discuss other issues not mentioned above.

[25]

9.

For defining / explaining - Government spending by area - Current / capital / transfers - The budget or fiscal policy.	Up to 2 marks per definition or explanation to a maximum of 4 marks
---	--

Award 1 mark for each logical link in the chain of reasoning:

For example As a method of redistributing income (1 mark) where taxation has been raised (allow 1 mark for taxation as a source for spending) enabling government to spend on means-tested (1 mark) such as housing benefit (1 mark for examples) or universal (1 mark) benefits such as the winter-fuel allowance (1 mark) which will reduce inequality (1 mark) by increasing the incomes of the poorest in society (1 mark) and correcting a potential market failure (1 mark) . Other examples include: boosting AD, Keynesian multipliers, supply-side policy, influencing the pattern of economic activity through subsidies, provision of merit goods, public goods and correcting other market failures.	Up to 15 marks
Use of diagrams to help support explanations, e.g. AD increasing, LRAS increasing, trade cycle, correcting market failures (such as positive externalities in consumption) or subsidy.	Up to 2 marks per diagram (1 mark for labelling, 1 mark for correct information shown) to a maximum of 4 marks.
Reference to the UK and/or other economies.	1 mark per reference to a maximum of 2 marks

[15]

10.

Level of response	Response	Max 9 marks
3	- is well organised and develops one or more of the key issues that are relevant to the question - shows sound knowledge and understanding of relevant economic terminology, concepts and principles - includes good application of relevant economic principles and/or good use of data to support the response - includes well-focused analysis with a clear, logical chain of reasoning - includes a relevant diagram that will, at the top of this level, be accurate and used appropriately	7 – 9 marks
2	- includes one or more issues that are relevant to the question - shows reasonable knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present - includes reasonable application of relevant economic principles and/or data to the question - includes some reasonable analysis but it might not be adequately developed and may be confused in places - may include a relevant diagram	4 – 6 marks
1	- is very brief and/or lacks coherence - shows some limited knowledge and understanding of economic terminology, concepts and principles but some errors are likely - demonstrates very limited ability to apply relevant economic principles and/or data to the question - may include some very limited analysis but the analysis lacks focus and/or becomes confused - may include a relevant diagram but the diagram is not used and/or is inaccurate in some respects.	1 – 3 marks

A micro diagram showing a rightward shift in supply is expected. The candidate could demonstrate the effects of increased exports, due to the subsidy, using an AD/AS diagram. Provided there is valid explanation, accept either a rightward shift in the SRAS or a rightward shift in AD.

Relevant issues include

- definitions/explanations: export subsidy, exports, trade, economic growth
- impact of an export subsidy on price, quantity, the volume and value of trade
- impact of an export subsidy on employment in particular industries
- linking trade to aggregate demand
- impact of export subsidies on investment
- linking export subsidies to both short-run and long-run economic growth

[9]

11.

In this part of the question, candidates will need to demonstrate that they are able to evaluate issues and arguments to support a conclusion if they are to be awarded **more than 15 marks**.

Where there is no **explicit** reference to the data, award a maximum of **21 marks**.

Level 5	Good analysis <u>and</u> good evaluation	22 to 25 marks <i>Mid-Point 24 marks</i>
Level 4	Good analysis <u>but</u> limited evaluation OR Reasonable analysis <u>and</u> reasonable evaluation	17 to 21 <i>Mid-Point 19 marks</i>
Level 3	Reasonable including some correct analysis <u>but</u> very limited evaluation	10 to 16 <i>Mid-Point 13 marks</i>
Level 2	Weak with some understanding	4 to 9 <i>Mid-Point 7 marks</i>
Level 1	Very weak	0 to 3 <i>Mid-Point 2 marks</i>

Issues and areas for discussion include

Introduction	- Productivity improvements - The EU economy - Macroeconomic performance.
Developing the response to the question: (Application)	- Improvements to infrastructure & investment (Extract E) - Difficult to improve productivity in some jobs (Extract E) - Links to living standards (Extract E) - Links to wages (Extract E) - Improvements in skills (Extract E) - Improvements to competitiveness (Extract F) - Solutions to unemployment problems (Extract F) - Boosts to welfare and lower prices (Extract F) - Product and process innovation (Extract F) - Structural weakness and lack of investment (Extract F)
(Analysis)	Arguments why productivity improvements may benefit the UK - Improvements in efficiency - Lower unit costs for firms and potential for increased profits - Improved competitiveness and the impact on the current account of the balance of payments - If UK productivity improvements can be achieved it may attract FDI and improve the capital account of the balance of payments - Higher wages - Economic growth - Possible boosts to tax revenue Arguments why productivity improvements may not benefit the UK - Productivity improvements may not require as many workers and impact on unemployment - Other countries may become more competitive at the UK's expense - If other countries are more competitive then it may divert FDI - Productivity improvements don't necessarily improve living standards - Other issues such as exchange rates may distort productivity gains - Opportunity cost of supply-side policies - Difficulties in measuring the impact of supply-side policies
Evaluation	- Potential conflicts between macroeconomic goals are traditionally reduced through productivity improvements. However, due to globalisation this may not always be the case - The UK's membership of the EU allows productivity improvements to be shared easily due to the free movement of workers and capital although this doesn't appear to have helped the UK's current membership - Knowledge transfer and process innovation have improved between economies however, the UK has still remained behind - Competitiveness relies on many other factors which are not covered by productivity - Consideration of UK's decision to leave the EU <i>Examiners should note that, for some of the weaker or average candidates, parts of the above represent quite sophisticated evaluation and so it is</i>

	<i>important to ensure that more basic evaluation is adequately rewarded where a genuine effort has been made to display that skill.</i>
Also give credit for	• Reference to the UK / other economies • Diagrams • An overall judgement on the issues raised

It will only be possible for candidates to consider a few of the above. They may also discuss other issues not mentioned above.

[25]

- 12.** The anticipated diagram would make appropriate use of diagrams, e.g. LRAS shifting right, SRAS shifting right, PPF's or AC curves.

Relevant issues include:

- Definition of investment.
- Explaining this in terms of a business entity in one country gaining ownership in another.
- Explaining the difference between FDI and portfolio investment.
- Increased foreign direct investment (FDI) by possibly bringing new technology or production processes into an existing firm which may reduce the need for labour to gain the same output and therefore boosts labour productivity.
- Improvements to infrastructure carried out by government capital spending such as improvements to motorways may allow transport costs to fall allowing the company to produce the same output for lower cost and boosts to efficiency and productivity.
- Research and development and increased competition due to FDI.
- Different forms of transport and communication links for infrastructure.

[9]

- 13.** In this part of the question, candidates will need to demonstrate that they are able to evaluate issues and arguments to support a conclusion if they are to be awarded **more than 15 marks**.

Where there is no **explicit** reference to the data, award a maximum of **21 marks**.

Level 5	Good analysis <u>and</u> good evaluation	22 to 25 marks <i>Mid-Point 24 marks</i>
Level 4	Good analysis <u>but</u> limited evaluation OR Reasonable analysis <u>and</u> reasonable evaluation	17 to 21 <i>Mid-Point 19 marks</i>
Level 3	Reasonable including some correct analysis <u>but</u> very limited evaluation	10 to 16 <i>Mid-Point 13 marks</i>
Level 2	Weak with some understanding	4 to 9 <i>Mid-Point 7 marks</i>
Level 1	Very weak	0 to 3 <i>Mid-Point 2 marks</i>

Issues and areas for discussion include

Introduction	• Macroeconomic performance • Trade • Free trade or trading blocs
Developing the response to the question: (Application)	• Focussing on improving trade in services (Extract B) • Sharing technology (Extract B) • Boosting exports, competition and investment (Extract B) • Improving international relations (Extract B) • Growth of Asian economies in comparison to slow EU growth (Extract C) • Problems for trade unions and environmental issues (Extract C) • Regional inequality (Extract C) • Unfair competition from state subsidised industry (Extract C) • Increasing power of MNCs in comparison to elected government (Extract C)
(Analysis)	Arguments why free trade agreements may benefit the UK: • Effects of increased export opportunities on output and employment • Effects of increased inward investment on output and employment • Impacts on the price of imports / semi-manufactures • Economies of scale and the effects on price level • Boosts to productivity and output • Benefits of competitive markets and sharing of technologies • Boosts to international relations • Improved choice / quality • Comparative advantage and the gains from trade. Arguments why free trade agreements may damage the UK: • The UK is unable to use protectionist policies such as quotas, tariffs, export subsidies • Possibly open to more external shocks • Sunrise / sunset industry arguments • May be subject to increased price fluctuations / instability • Loss of potential tariff revenue (although this is not directly received in the EU) • Cultural and strategic industry arguments • May be unable to protect against “dumping” • Environmental issues with increased transportation • Unclear growth and employment effects • Problems for small business in comparison to MNCs • May give an impetus to further deregulation / privatisation.
Evaluation	• The UK being unable to negotiate their own deals due to EU membership at the moment, however after we leave the EU it can conduct its own negotiations. • The EU currently not having deals in place in comparison to other economies • Benefits and costs depending on the various stakeholders points of view and short-term benefits, such as lower prices, may have long-term costs such as increased structural unemployment

	- Regions of the UK may experience different impacts - Trade deals may be done which don't directly involve the UK but could benefit it or could potentially damage it such as the TPP - References to UK's current situation affecting trade <i>Examiners should note that, for some of the weaker or average candidates, parts of the above represent quite sophisticated evaluation and so it is important to ensure that more basic evaluation is adequately rewarded where a genuine effort has been made to display that skill.</i>
Also give credit for	- Reference to the UK / other economies - Diagrams - An overall judgement on the issues raised.

It will only be possible for candidates to consider a few of the above. They may also discuss issues not discussed above.

[25]

14.

Relevant issues include:

- definitions/explanations: government spending, taxation, economic activity
- explaining the different forms of government spending such as capital/current /transfers
- explaining the levels of government spending
- explaining the reasons for government spending i.e. the redistribution of income and wealth, merit good provision etc.
- explaining how changes in government spending and taxation can influence aggregate demand both directly and indirectly
- explaining discretionary policy
- explaining automatic stabilisers
- explaining the effects of the economic cycle on government spending and taxation
- explaining how changes in government spending could change aggregate supply such as:
 - capital spending on infrastructure
 - training and education
 - subsidies/grants for research and development
 - subsidies/grants for investment
 - tax credits
 - assisted childcare and the effects on labour supply
 - any other relevant point
- multiplier and possible accelerator effects
- explaining the different types of taxation
- explaining how changes in taxation could change aggregate supply such as:
 - reducing income tax creating incentives to work
 - reducing corporation tax allowing firms to retain more profit for investment
 - reducing taxation, possibly making UK firms more competitive abroad and effects on supply
 - using taxation (tariffs) as a form of protectionism, aiding domestic supply
 - any other relevant point.

The use of relevant diagrams such as AD/AS, or labour market diagrams to support the analysis should be taken into account when assessing the quality of the candidate's response to the question.

Note: Unless a candidate considers both government expenditure and taxation, they are unlikely to have 'developed a selection of key issues that are relevant to the question' and therefore unlikely to achieve level 3.

Level of response	Response	Max 15 marks
3	A good response provides an answer that: • is well organised and develops a selection of the key issues that are relevant to the question • shows sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors • includes good application of relevant economic principles to the given context and, where appropriate, good use of data to support the response • includes well-focused analysis with clear, logical chains of reasoning.	11 – 15 marks
2	A reasonable response provides an answer that: • focuses on issues that are relevant to the question • shows satisfactory knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present • includes reasonable application of relevant economic principles to the given context and, where appropriate, some use of data to support the response • includes some reasonable analysis but which might not be adequately developed or becomes confused in places.	6 – 10 marks
1	A weak response provides an answer that: • has identified one or more relevant issues • has some limited knowledge and understanding of economic terminology, concepts and principles but some errors are likely • has very limited application of relevant economic principles to the given context and/or data to the question • might have some limited analysis but it may lack focus and/or become confused.	1 – 5 marks

[15]

15.

Anticipated diagrams might utilise the SRAS shifting right, micro diagrams demonstrating falling costs, removal of tariffs/quotas.

Relevant issues include:

- A relevant definition of comparative advantage.
- The difference between acquired and natural comparative advantage.
- The difference between absolute advantage and comparative advantage.
- A numerical example / diagram.
- Improved communication through developments in technology, such as the internet has allowed individuals to order goods across international borders.
- Further to this, international pay sites such as PayPal facilitate the easy exchange of currency with minimal transaction costs which has increased the volume of goods and services traded abroad.
- The work of the WTO
- Removal of protectionism
- Creation of trading blocs
- Economies of scale
- The role of MNC's
- Financial liberalisation
- Containerisation
- Reduced transport costs.

[9]

16.

Areas for discussion include:

- definitions/explanations: burden of taxation, taxation, direct/indirect taxation, fiscal policy
- explaining the burden of taxation, expressed, for example, as a % of GDP
- describing the current forms of taxation used in the UK and recent changes
- explaining the principals of taxation such as equity
- giving examples of the various direct and indirect taxes
- identifying the differences between progressive, regressive and proportional tax
- the redistributive impact of direct and indirect taxation
- how falling direct taxes may:
 - incentivise work
 - reduce tax avoidance/evasion
 - influence consumption
 - influence investment
 - any other relevant point
- how rising indirect taxes may:
 - affect inflation
 - reduce consumption of demerit goods
 - affect SRAS
 - affect consumption decisions
 - affect wage demands
- evaluating the size of the shift
- evaluating empirical evidence
- evaluating the period of time over which the shift takes place
- policy myopia and political ideology affecting decisions
- the Laffer curve.

The use of relevant diagrams such as the Laffer curve to support the analysis should be taken into account when assessing the quality of the student's response to the question.

Level of response	Response	Max 25 marks
5	Sound, focused analysis and well-supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes good application of relevant economic principles to the given context and, where appropriate, good use of data to support the response - includes well-focused analysis with clear, logical chains of reasoning - includes supported evaluation throughout the response and in a final conclusion.	21 – 25 marks
4	Sound, focused analysis and some supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes some good application of relevant economic principles to the given context and, where appropriate, some good use of data to support the response - includes some well-focused analysis with clear, logical chains of reasoning - includes some reasonable, supported evaluation.	16 – 20 marks
3	Some reasonable analysis but generally unsupported evaluation that: - focuses on issues that are relevant to the question, showing satisfactory knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present - includes reasonable application of relevant economic principles to the given context and, where appropriate, some use of data to support the response - includes some reasonable analysis but which might not be adequately developed or becomes confused in places - includes fairly superficial evaluation; there is likely to be some attempt to make relevant judgements but these are not well-supported by arguments and/or data.	11 – 15 marks
2	A fairly weak response with some understanding that: - includes some limited knowledge and understanding of economic terminology, concepts and principles but some errors are likely - includes some limited application of relevant economic principles to the given context and/or data to the question - includes some limited analysis but it may lack focus and/or become confused - includes some evaluation which is weak and unsupported.	6 – 10 marks
1	A very weak response that: - includes little relevant knowledge and understanding of economic terminology, concepts and principles - includes application to the given context which, at best, is very weak - includes attempted analysis which is weak and unsupported.	1 – 5 marks

**17.****Areas for discussion include:**

- definitions/explanations: the balance of payments, the current account, current account deficit
- explaining the difference between a surplus or deficit on current account
- explaining the composition of the current account of the balance of payments
- explaining the historical experience of the UK's current account
- explaining the causes of deficits
- explain possible measures to reduce the deficit such as:
 - exchange rate manipulation
 - changes in interest rates potentially affecting the exchange rate
 - expenditure-reducing policies
 - expenditure-switching policies
 - the role of protectionism
 - government role in export promotion/trade deals
 - the role of fiscal and monetary policy
 - supply-side improvements which might begin to provide a solution to the weakness, such as:
 - competitiveness/unit labour costs
 - investment (human and physical capital)
 - technology, R&D and productivity
 - infrastructure
- consideration of the UK's membership of the WTO and EU restricting its ability to use protectionism
- consideration of whether the deficit is a problem if the capital account is in surplus
- consideration of the impact on other macroeconomic goals of trying to reduce the deficit on the current account of the balance of payments.

The use of relevant diagrams such as AD/AS diagrams to support the analysis should be taken into account when assessing the quality of the student's response to the question.

Level of response	Response	Max 25 marks
5	Sound, focused analysis and well-supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes good application of relevant economic principles to the given context and, where appropriate, good use of data to support the response - includes well-focused analysis with clear, logical chains of reasoning - includes supported evaluation throughout the response and in a final conclusion.	21 – 25 marks
4	Sound, focused analysis and some supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes some good application of relevant economic principles to the given context and, where appropriate, some good use of data to support the response - includes some well-focused analysis with clear, logical chains of reasoning - includes some reasonable, supported evaluation.	16 – 20 marks
3	Some reasonable analysis but generally unsupported evaluation that: - focuses on issues that are relevant to the question, showing satisfactory knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present - includes reasonable application of relevant economic principles to the given context and, where appropriate, some use of data to support the response - includes some reasonable analysis but which might not be adequately developed or becomes confused in places - includes fairly superficial evaluation; there is likely to be some attempt to make relevant judgements but these are not well-supported by arguments and/or data.	11 – 15 marks
2	A fairly weak response with some understanding that: - includes some limited knowledge and understanding of economic terminology, concepts and principles but some errors are likely - includes some limited application of relevant economic principles to the given context and/or data to the question - includes some limited analysis but it may lack focus and/or become confused - includes some evaluation which is weak and unsupported.	6 – 10 marks
1	A very weak response that: - includes little relevant knowledge and understanding of economic terminology, concepts and principles - includes application to the given context which, at best, is very weak - includes attempted analysis which is weak and unsupported.	1 – 5 marks

**18.****Relevant issues include:**

- definitions/explanations: unemployment, government policies, the natural rate of unemployment
- linking the natural rate to equilibrium in the labour market
- identifying the natural rate as being caused by mainly “voluntary” unemployed workers
- linking the natural rate to structural, frictional or real wage unemployment
- explaining the nature of the supply and demand for labour
- explaining the role of supply-side policies in reducing the natural rate
- considering interventionist or laissez-faire approaches to reducing the natural rate
- explaining the role of wage and inflationary expectations in altering the natural rate
- explaining any of the following:
 - the level of JSA
 - the level of taxation
 - the NMW
 - training schemes
 - transferable skills
 - occupational mobility
 - geographical mobility
 - trade union reform
 - labour market flexibility
 - childcare assistance
 - reducing hysteresis/long-term unemployment
 - reducing wage expectations
 - or any other valid reason.

The use of relevant diagrams to support the analysis such as a long-run Phillips curve or a labour market diagram should be taken into account when assessing the quality of the candidate's response to the question.

Level of response	Response	Max 15 marks
3	A good response provides an answer that: • is well organised and develops a selection of the key issues that are relevant to the question • shows sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors • includes good application of relevant economic principles to the given context and, where appropriate, good use of data to support the response • includes well-focused analysis with clear, logical chains of reasoning.	11 – 15 marks
2	A reasonable response provides an answer that: • focuses on issues that are relevant to the question • shows satisfactory knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present • includes reasonable application of relevant economic principles to the given context and, where appropriate, some use of data to support the response • includes some reasonable analysis but which might not be adequately developed or becomes confused in places.	6 – 10 marks
1	A weak response provides an answer that: • has identified one or more relevant issues • has some limited knowledge and understanding of economic terminology, concepts and principles but some errors are likely • has very limited application of relevant economic principles to the given context and/or data to the question • might have some limited analysis but it may lack focus and/or become confused.	1 – 5 marks

[15]

Level of response	Response	Max 9 marks
3	- is well organised and develops one or more of the key issues that are relevant to the question - shows sound knowledge and understanding of relevant economic terminology, concepts and principles - includes good application of relevant economic principles and/or good use of data to support the response - includes well-focused analysis with a clear, logical chain of reasoning - includes a relevant diagram that will, at the top of this level, be accurate and used appropriately	7 – 9 marks
2	- includes one or more issues that are relevant to the question - shows reasonable knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present - includes reasonable application of relevant economic principles and/or data to the question - includes some reasonable analysis but it might not be adequately developed and may be confused in places	4 – 6 marks
1	- is very brief and/or lacks coherence - shows some limited knowledge and understanding of economic terminology, concepts and principles but some errors are likely - demonstrates very limited ability to apply relevant economic principles and/or data to the question - may include some very limited analysis but the analysis lacks focus and/or becomes confused - may include a relevant diagram but the diagram is not used and/or is inaccurate in some respects.	1 – 3 marks

An AD/AS diagram is expected, showing a rightward shift of the AS curve, this can either be LRAS or SRAS.

Relevant issues include

- definitions/explanations: productivity, supply side, deflation, price level
- possible causes of increased productivity
- relating productivity to supply-side policies (interventionist or market-based)
- linking productivity to average costs/costs of the factors of production
- linking productivity to increases in the long-run productive potential
- explaining the link between falling costs of production and the general price-level.

[9]

20.

Areas for discussion include:

- definitions/explanations: monetary policy, deflation, developed economies
- deflation and the different types (malign v benign)
- the effects of deflation
- the nature of developed economies and different experiences of deflation
- the role of interest rates and the transmission mechanism
- the effects of interest rates on investment, employment, saving and consumption
- the link between long-term saving and long-term investment
- the effectiveness of interest rates at very low levels including negative interest rates
- consideration of the MPC's role, primarily in targeting inflation but also in targeting growth
- consideration of differences in the two economies which may determine the effectiveness of monetary policy
- the use of quantitative easing and consideration of its success
- the possible role of the exchange rate in stimulating the economy
- the use of fiscal policy and fiscal stimulus
- considering how government debt may affect the ability to use fiscal policy
- considering how private-sector debt may influence the effectiveness of policies designed to combat deflation
- consideration of the potential conflicts in policy
- the significance of economic shocks and their impact on policies to tackle deflation.

The use of relevant diagrams to support the analysis should be taken into account when assessing the quality of the candidate's response to the question.

Level of response	Response	Max 25 marks
5	Sound, focused analysis and well-supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes good application of relevant economic principles to the given context and, where appropriate, good use of data to support the response - includes well-focused analysis with clear, logical chains of reasoning - includes supported evaluation throughout the response and in a final conclusion.	21 – 25 marks
4	Sound, focused analysis and some supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes some good application of relevant economic principles to the given context and, where appropriate, some good use of data to support the response - includes some well-focused analysis with clear, logical chains of reasoning - includes some reasonable, supported evaluation.	16 – 20 marks
3	Some reasonable analysis but generally unsupported evaluation that: - focuses on issues that are relevant to the question, showing satisfactory knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present - includes reasonable application of relevant economic principles to the given context and, where appropriate, some use of data to support the response - includes some reasonable analysis but which might not be adequately developed or becomes confused in places - includes fairly superficial evaluation; there is likely to be some attempt to make relevant judgements but these are not well-supported by arguments and/or data.	11 – 15 marks
2	A fairly weak response with some understanding that: - includes some limited knowledge and understanding of economic terminology, concepts and principles but some errors are likely - includes some limited application of relevant economic principles to the given context and/or data to the question - includes some limited analysis but it may lack focus and/or become confused - includes some evaluation which is weak and unsupported.	6 – 10 marks
1	A very weak response that: - includes little relevant knowledge and understanding of economic terminology, concepts and principles - includes application to the given context which, at best, is very weak - includes attempted analysis which is weak and unsupported.	1 – 5 marks

**21.****Areas for discussion include:**

- definitions/explanations: economic development, market-based strategies, interventionist strategies
- differences and links between economic growth and economic development
- examples of market-based strategies such as privatisation, deregulation, liberalisation of foreign trade, removing restrictions on international investment
- examples of interventionist strategies such as government spending on infrastructure, protectionist policies and government spending on health and education
- the pros and cons of market-based approaches to achieving development
- the pros and cons of interventionist approaches to achieving development
- difficulties in measuring development in terms of economic/human development
- the potential barriers that may hinder India's development
- analysis of the impact of development on formal employment/informal employment
- the progression from the primary sector to secondary sector employment
- whether growth and development are sustainable
- economic/social/political freedom arguments
- costs of development **and/or** growth and their impact on living standards
- the effectiveness of policies that might stimulate development
- protectionism as an aid to development
- the role of investment (domestic and foreign direct)
- key industries in development.

The use of relevant diagrams to support the analysis should be taken into account when assessing the quality of the candidate's response to the question.

Level of response	Response	Max 25 marks
5	Sound, focused analysis and well-supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes good application of relevant economic principles to the given context and, where appropriate, good use of data to support the response - includes well-focused analysis with clear, logical chains of reasoning - includes supported evaluation throughout the response and in a final conclusion.	21 – 25 marks
4	Sound, focused analysis and some supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes some good application of relevant economic principles to the given context and, where appropriate, some good use of data to support the response - includes some well-focused analysis with clear, logical chains of reasoning - includes some reasonable, supported evaluation.	16 – 20 marks
3	Some reasonable analysis but generally unsupported evaluation that: - focuses on issues that are relevant to the question, showing satisfactory knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present - includes reasonable application of relevant economic principles to the given context and, where appropriate, some use of data to support the response - includes some reasonable analysis but which might not be adequately developed or becomes confused in places - includes fairly superficial evaluation; there is likely to be some attempt to make relevant judgements but these are not well-supported by arguments and/or data.	11 – 15 marks
2	A fairly weak response with some understanding that: - includes some limited knowledge and understanding of economic terminology, concepts and principles but some errors are likely - includes some limited application of relevant economic principles to the given context and/or data to the question - includes some limited analysis but it may lack focus and/or become confused - includes some evaluation which is weak and unsupported.	6 – 10 marks
1	A very weak response that: - includes little relevant knowledge and understanding of economic terminology, concepts and principles - includes application to the given context which, at best, is very weak - includes attempted analysis which is weak and unsupported.	1 – 5 marks

22.

Relevant issues include:

- definitions: fiscal policy, government spending, taxation, supply-side policy
- explaining how government spending can help the supply-side through:
 - the provision of education and training
 - the provision of infrastructure
 - grants and subsidies for R+D and investment
 - increased spending on transportation to increase geographical mobility
 - industrial and regional policy
 - reduction of out-of-work welfare benefits to reduce the replacement ratio and increase labour supply
 - the use of in-work welfare benefits
- explaining how taxation can help the supply side through:
 - reducing corporation tax to encourage enterprise and FDI
 - reducing business rates to encourage investment
 - reducing income tax to encourage labour participation
 - altering income tax rates and thresholds to encourage labour participation
 - using reduced taxation, such as business rates, as part of regional policy.
- explaining how supply-side policies improve the quantity and quality of the factors of production
- explaining how supply-side policies can target both labour and product markets
- explaining how supply-side policies can be interventionist or market based

The use of relevant diagrams to support the analysis should be taken into account when assessing the quality of the student's response to the question.

Level of response	Response	Max 15 marks
3	A good response provides an answer that: • is well organised and develops a selection of the key issues that are relevant to the question • shows sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors • includes good application of relevant economic principles to the given context and, where appropriate, good use of data to support the response • includes well-focused analysis with clear, logical chains of reasoning.	11 – 15 marks
2	A reasonable response provides an answer that: • focuses on issues that are relevant to the question • shows satisfactory knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present • includes reasonable application of relevant economic principles to the given context and, where appropriate, some use of data to support the response • includes some reasonable analysis but which might not be adequately developed or becomes confused in places.	6 – 10 marks
1	A weak response provides an answer that: • has identified one or more relevant issues • has some limited knowledge and understanding of economic terminology, concepts and principles but some errors are likely • has very limited application of relevant economic principles to the given context and/or data to the question • might have some limited analysis but it may lack focus and/or become confused.	1 – 5 marks

[15]

23.

D

[1]

**24.****Areas for discussion include:**

- definitions/explanations: economic development, MNCs, LEDCs
- positive roles of MNCs in developing nations such as the effects on:
 - employment and job creation
 - economic growth (short-run and long-run)
 - the trade balance (eg increase exports)
 - productivity and international competitiveness
 - infrastructure
 - investment and positive multiplier effects
 - development of human capital
 - knowledge and technological transfer
 - standards of living
- potential negative roles of MNCs in developing nations such as the effects on:
 - the environment
 - the exploitation of workers
 - the destruction of culture
 - the indigenous industries being unable to compete
 - the unfair political influence which MNCs may possess
 - possible tax avoidance
 - the repatriation of profits which is negative on GNP
- explaining the main differences between LEDCs and MEDCs
- examples of MNCs and countries in which they have set up
- the issue that job creation may be limited due to the capital-intensive nature of the FDI and filling management roles from the source nation
- that the role depends upon the objectives of the MNC and that initial positive effects may change over time
- what may happen if the MNC had not been involved in the economy. Would domestic firms have fared better?
- the individual government's ability to control the power of the MNCs may determine whether, on balance, they have a positive impact on development.

The use of relevant diagrams to support the analysis should be taken into account when assessing the quality of the student's response to the question.

Level of response	Response	Max 25 marks
5	Sound, focused analysis and well-supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes good application of relevant economic principles to the given context and, where appropriate, good use of data to support the response - includes well-focused analysis with clear, logical chains of reasoning - includes supported evaluation throughout the response and in a final conclusion.	21 – 25 marks
4	Sound, focused analysis and some supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes some good application of relevant economic principles to the given context and, where appropriate, some good use of data to support the response - includes some well-focused analysis with clear, logical chains of reasoning - includes some reasonable, supported evaluation.	16 – 20 marks
3	Some reasonable analysis but generally unsupported evaluation that: - focuses on issues that are relevant to the question, showing satisfactory knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present - includes reasonable application of relevant economic principles to the given context and, where appropriate, some use of data to support the response - includes some reasonable analysis but which might not be adequately developed or becomes confused in places - includes fairly superficial evaluation; there is likely to be some attempt to make relevant judgements but these are not well-supported by arguments and/or data.	11 – 15 marks
2	A fairly weak response with some understanding that: - includes some limited knowledge and understanding of economic terminology, concepts and principles but some errors are likely - includes some limited application of relevant economic principles to the given context and/or data to the question - includes some limited analysis but it may lack focus and/or become confused - includes some evaluation which is weak and unsupported.	6 – 10 marks
1	A very weak response that: - includes little relevant knowledge and understanding of economic terminology, concepts and principles - includes application to the given context which, at best, is very weak - includes attempted analysis which is weak and unsupported.	1 – 5 marks

25.

Relevant issues include:

- definitions/explanations: economic growth, stable growth, LEDCs
- explaining the main characteristics of LEDCs with reference to measurements such as the HDI or GDP
- explaining factors that may be barriers to growth such as:
 - corruption
 - lack of property rights (both physical and intellectual)
 - poor infrastructure
 - a lack of, or poor quality, human capital
 - a lack of, or poor quality, physical capital
 - a lack of savings causing a lack of capital accumulation
 - institutional factors
 - primary product dependency
 - informal employment and a lack of tax revenue.

Note: some candidates may answer this question in terms of why MEDCs find it easier to achieve economic growth. This approach is fine and should be rewarded accordingly.

The use of relevant diagrams to support the analysis should be taken into account when assessing the quality of the student's response to the question.

Level of response	Response	Max 15 marks
3	A good response provides an answer that: - is well organised and develops a selection of the key issues that are relevant to the question - shows sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes good application of relevant economic principles to the given context and, where appropriate, good use of data to support the response - includes well-focused analysis with clear, logical chains of reasoning.	11 – 15 marks
2	A reasonable response provides an answer that: - focuses on issues that are relevant to the question - shows satisfactory knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present - includes reasonable application of relevant economic principles to the given context and, where appropriate, some use of data to support the response - includes some reasonable analysis but which might not be adequately developed or becomes confused in places.	6 – 10 marks
1	A weak response provides an answer that: - has identified one or more relevant issues - has some limited knowledge and understanding of economic terminology, concepts and principles but some errors are likely - has very limited application of relevant economic principles to the given context and/or data to the question - might have some limited analysis but it may lack focus and/or become confused.	1 – 5 marks

[15]

26.

C

[1]

**27.****Areas for discussion include:**

- definitions/explanations: inflation, deflation
- explaining the different types of inflation (demand-pull and cost-push)
- explaining the different types of deflation (malign and benign)
- explaining the UK's recent history of inflation and deflation
- explaining the causes of inflation and deflation
- explaining the effects of inflation or deflation upon:
 - individuals, such as inflation causing a higher cost of living
 - borrowers, such as the relative value of debt falling with inflation
 - savers, such as inflation eroding the value of savings
 - those on fixed incomes such as the current government policy of raising JSA at 1% or inflation (whichever is lowest)
 - real interest rates and borrowing
 - firms and investment
 - labour markets, such as individuals with low bargaining power being unable to negotiate higher wages
 - consumption decisions, such as delayed consumption due to deflation
 - international competitiveness
 - activity and stability
- considering the different types of inflation in terms of creeping or hyper-inflation
- considering that inflation may benefit one group but at the expense of another
- considering that the type of deflation may determine the effects
- considering the duration of the inflation or deflation
- considering the ability of the MPC to return to the target of 2% inflation, eg the problem of the lower bound to interest rates (liquidity trap).

The use of relevant diagrams to support the analysis should be taken into account when assessing the quality of the candidate's response to the question.

Level of response	Response	Max 25 marks
5	Sound, focused analysis and well-supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes good application of relevant economic principles to the given context and, where appropriate, good use of data to support the response - includes well-focused analysis with clear, logical chains of reasoning - includes supported evaluation throughout the response and in a final conclusion.	21 – 25 marks
4	Sound, focused analysis and some supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes some good application of relevant economic principles to the given context and, where appropriate, some good use of data to support the response - includes some well-focused analysis with clear, logical chains of reasoning - includes some reasonable, supported evaluation.	16 – 20 marks
3	Some reasonable analysis but generally unsupported evaluation that: - focuses on issues that are relevant to the question, showing satisfactory knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present - includes reasonable application of relevant economic principles to the given context and, where appropriate, some use of data to support the response - includes some reasonable analysis but which might not be adequately developed or becomes confused in places - includes fairly superficial evaluation; there is likely to be some attempt to make relevant judgements but these aren't well-supported by arguments and/or data.	11 – 15 marks
2	A fairly weak response with some understanding that: - includes some limited knowledge and understanding of economic terminology, concepts and principle but some errors are likely - includes some limited application of relevant economic principles to the given context and/or data to the question - includes some limited analysis but it may lack focus and/or become confused - includes some evaluation which is weak and unsupported.	6 – 10 marks
1	A very weak response that: - includes little relevant knowledge and understanding of economic terminology, concepts and principles - includes application to the given context which is, at best, very weak - includes attempted analysis which is weak and unsupported.	1 – 5 marks

28.

Areas for discussion include:

- definitions/explanations: financial markets, macroeconomic stability, financial stability
- relating rules and regulations to the FPC, FCA, and PRA and explaining the functions of each of the regulatory bodies
- explaining both micro and macro prudential regulation
- giving examples, such as explaining the build up to the last major financial crisis in the UK in 2007/08
- explaining systemic risk and the impacts on the real economy in terms of:
 - growth
 - unemployment
 - inflation
 - government finances
- explaining liquidity ratios and the 'stress-testing' of banks
- explaining the role of other economic agents in attempting to create macroeconomic stability
 - such as the MPC's role in price stability and helping achieve the government's objectives for growth and unemployment
 - such as the OBR's role in monitoring the impact of government budgetary changes
 - such as the EU's rules regarding fiscal stability
 - such as the Basel accords
- considering the possibility of government failure in banking or regulatory capture
- considering financial market failure, speculative bubbles and moral hazard
- considering that too much regulation may cause 'banking brain-drain' and damage the UK's financial services industry in the long run
- considering the relative success (or failure) of current regulations or improvements that can be made to the system
- considering the possibility of market failure in banking such as asymmetric information in financial products
- considering that economic stability is much more than just financial stability
- considering that some external economic shocks may not be fully insulated against.

The use of relevant diagrams to support the analysis should be taken into account when assessing the quality of the student's response to the question.

Level of response	Response	Max 25 marks
5	Sound, focused analysis and well-supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes good application of relevant economic principles to the given context and, where appropriate, good use of data to support the response - includes well-focused analysis with clear, logical chains of reasoning - includes supported evaluation throughout the response and in a final conclusion.	21 – 25 marks
4	Sound, focused analysis and some supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes some good application of relevant economic principles to the given context and, where appropriate, some good use of data to support the response - includes some well-focused analysis with clear, logical chains of reasoning - includes some reasonable, supported evaluation.	16 – 20 marks
3	Some reasonable analysis but generally unsupported evaluation that: - focuses on issues that are relevant to the question, showing satisfactory knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present - includes reasonable application of relevant economic principles to the given context and, where appropriate, some use of data to support the response - includes some reasonable analysis but which might not be adequately developed or becomes confused in places - includes fairly superficial evaluation; there is likely to be some attempt to make relevant judgements but these aren't well-supported by arguments and/or data.	11 – 15 marks
2	A fairly weak response with some understanding that: - includes some limited knowledge and understanding of economic terminology, concepts and principle but some errors are likely - includes some limited application of relevant economic principles to the given context and/or data to the question - includes some limited analysis but it may lack focus and/or become confused - includes some evaluation which is weak and unsupported.	6 – 10 marks
1	A very weak response that: - includes little relevant knowledge and understanding of economic terminology, concepts and principles - includes application to the given context which is, at best, very weak - includes attempted analysis which is weak and unsupported.	1 – 5 marks

- definitions/explanations: foreign direct investment (FDI), living standards
- explaining how living standards can be measured in terms of monetary measures such as GDP per capita
- explaining how living standards can be measured in terms of qualitative factors such as education, health, inequality, the environment, human development and sustainability
- alternative measures of living standards such as the Human Development Index (HDI)
- explaining the benefits of FDI on living standards in terms of:
 - employment
 - incomes and consumption possibilities
 - economic growth and GDP per capita
 - multiplier/accelerator arguments
 - human development/skills progression
 - potential improvements in infrastructure created by MNCs
 - possible health implications of increased formal, regular employment
 - generating more government tax revenue which may be spent on merit/public goods without creating debt
 - crowding in arguments
- explaining the drawbacks of FDI on living standards in terms of:
 - exploitation of workers by MNCs
 - damages to the environment caused by MNCs
 - possible inflationary pressures causing the cost of living to rise
 - 'footloose' industries causing instability in employment for example
 - repatriation of profits acting as a leakage from the circular flow
- considering that governments may not benefit from rising tax revenues as they may have been forced to offer tax breaks
- how global shocks, such as the pandemic, may lead to changes in investment beyond the control of the domestic government
- the alternatives to attracting FDI to improve living standards such as aid and the possible problems of tied aid
- other possible alternatives such as government spending and the potential problems of rising debt
- other possible alternatives such as the promotion of free trade or protectionism and the potential problems of each method
- whether the government should intervene at all or if the free market would provide better solutions
- the possible inequalities caused by FDI and the possible regional differences
- issues such as corruption affecting the distribution of the benefits of FDI.

The use of relevant diagrams to support the analysis should be taken into account when assessing the quality of the student's response to the question.

Level of response	Response	Max 25 marks
5	Sound, focused analysis and well-supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes good application of relevant economic principles to the given context and, where appropriate, good use of data to support the response - includes well-focused analysis with clear, logical chains of reasoning - includes supported evaluation throughout the response and in a final conclusion.	21–25 marks
4	Sound, focused analysis and some supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes some good application of relevant economic principles to the given context and, where appropriate, some good use of data to support the response - includes some well-focused analysis with clear, logical chains of reasoning - includes some reasonable, supported evaluation.	16–20 marks
3	Some reasonable analysis but generally unsupported evaluation that: - focuses on issues that are relevant to the question, showing satisfactory knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present - includes reasonable application of relevant economic principles to the given context and, where appropriate, some use of data to support the response - includes some reasonable analysis but which might not be adequately developed or becomes confused in places - includes fairly superficial evaluation; there is likely to be some attempt to make relevant judgments but these are not well-supported by arguments and/or data.	11–15 marks
2	A fairly weak response with some understanding that: - includes some limited knowledge and understanding of economic terminology, concepts and principles but some errors are likely - includes some limited application of relevant economic principles to the given context and/or data to the question - includes some limited analysis but it may lack focus and/or become confused - includes some evaluation which is weak and unsupported.	6–10 marks
1	A very weak response that: - includes little relevant knowledge and understanding of economic terminology, concepts and principles - includes application to the given context which is, at best, very weak - includes attempted analysis which is weak and unsupported.	1–5 marks

**30.****Areas for discussion include:**

- definitions/explanations: policies, trade surplus, economic growth
- explaining the trade surplus in terms of the value of exports and imports
- explaining how a trade surplus could add to aggregate demand (AD)
- linking net trade to injections to the circular flow
- linking net trade to the multiplier effect
- explaining policies which may be used to boost a trade surplus such as:
 - supply-side policies (R+D, education, infrastructure)
 - exchange rate manipulation
 - protectionism
 - expenditure-reducing policies (although this isn't really the emphasis of the context)
 - ending the trade war with Japan
- explaining the drawbacks of each method and limitations such as:
 - supply-side policies (time lags/expense)
 - exchange rate manipulation (misallocating resources)
 - protectionism (retaliation)
 - expenditure-reducing policies (damaging other macroeconomic objectives)
- explaining the effects of external shocks on trade
- explaining how global shocks, such as a pandemic, may lead to unavoidable disruption of trade
- considering the effects of a trade surplus on output, employment and investment
- considering the capital and financial accounts and their potential impacts on the economy
- considering how long-run economic growth can be created by a trade surplus
- considering possible trade-offs with other macroeconomic goals
- considering the possible effects on exchange rates in the long run
- considering the extent to which South Korea can manipulate its trade outcomes in a globalised world.

The use of relevant diagrams to support the analysis should be taken into account when assessing the quality of the student's response to the question.

Level of response	Response	Max 25 marks
5	Sound, focused analysis and well-supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes good application of relevant economic principles to the given context and, where appropriate, good use of data to support the response - includes well-focused analysis with clear, logical chains of reasoning - includes supported evaluation throughout the response and in a final conclusion.	21 – 25 marks
4	Sound, focused analysis and some supported evaluation that: - is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors - includes some good application of relevant economic principles to the given context and, where appropriate, some good use of data to support the response - includes some well-focused analysis with clear, logical chains of reasoning - includes some reasonable, supported evaluation.	16 – 20 marks
3	Some reasonable analysis but generally unsupported evaluation that: - focuses on issues that are relevant to the question, showing satisfactory knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present - includes reasonable application of relevant economic principles to the given context and, where appropriate, some use of data to support the response - includes some reasonable analysis but which might not be adequately developed or becomes confused in places - includes fairly superficial evaluation; there is likely to be some attempt to make relevant judgements but these aren't well-supported by arguments and/or data.	11 – 15 marks
2	A fairly weak response with some understanding that: - includes some limited knowledge and understanding of economic terminology, concepts and principles but some errors are likely - includes some limited application of relevant economic principles to the given context and/or data to the question - includes some limited analysis but it may lack focus and/or become confused - includes some evaluation which is weak and unsupported.	6 – 10 marks
1	A very weak response that: - includes little relevant knowledge and understanding of economic terminology, concepts and principles - includes application to the given context which is, at best, very weak - includes attempted analysis which is weak and unsupported.	1 – 5 marks
