

Mark Scheme

Q1.

Question Number	Answer	Mark
(a)	B	(1)

Q2.

Question Number	Answer	Mark
(b)	Application 3, Analysis 1 Application: 2 marks for: - the calculation for opportunity cost for Columbia (1) - the calculation for opportunity cost for Zambia (1) and 1 mark for: - in Colombia the opportunity cost of producing 1kg of emeralds is 0.1 million tonnes of copper (1) - in Zambia the opportunity cost of producing 1kg of emeralds is 1 million tonnes of copper (1) - Colombia has a comparative advantage in the production of emeralds (1). Analysis 1 mark for inferences from calculations carried out, e.g. - Columbia can produce emeralds relatively more efficiently/at a lower opportunity cost than Zambia (1).	(4)

Question Number	Answer	Mark
(a)	The only correct answer is D <i>A is not correct because this is likely to increase</i> <i>B is not correct because this is likely to increase</i> <i>C is not correct because this is likely to increase</i>	(1)

Question Number	Answer	Mark
(b)	Knowledge 2, Application 1, Analysis 1 Knowledge/understanding: 2 marks for e.g. - Countries specialise in the goods in which they have a comparative advantage (1) lower opportunity cost (1) - Through trade each country can now consume more in total as they focus on what they can produce more efficiently (1) - Identification of concept with numerical or diagrammatic example (1) - Movement to freer trade thanks to CETA agreement (1) Application: 1 mark for e.g. - Related to Europe/Canada, e.g. Canadian timber exports, EU car exports, or other relevant examples (1) - Use of numerical or diagrammatic example (1) - Reference to data, e.g. increase trade by 20% (1) Analysis: Linked development 1 mark for e.g. - Countries are now producing/consuming more so this means an increase in GDP (1) - Explanation of numerical or diagrammatic example (1)	(4)

Q3.

Question Number	Indicative content	Mark
	Knowledge 4, Application 4, Analysis 8, Evaluation 9 Likely impact includes: • Increased global trade • Increased global output with reference to comparative advantage • Increased incomes in developing countries due to growth of export industries/investment from MNCs • Increased global competition between firms leading to lower prices for consumers globally • Increased supply globally leading to less global inflationary pressures • Growth of multinational corporations • Increased migration reducing unemployment globally as people move to where jobs are available/where their skills are in need • Diagrammatic analysis e.g., using PPF	
	Evaluation might include e.g.: • Growth of protectionism may restrict global trade and/or limit comparative advantage • Problems with over-reliance on imports encouraging more firms/countries to look at domestic production • Increased production in countries with lower labour costs may help to reduce global inequality • Greater global integration of supply chains increases chances of delays in transport/delivery around the world • Increased inequality as some industries close down due to competition from abroad • Structural unemployment in some countries if industries move abroad • Increased exploitation by MNCs of workers in countries with weak regulations • Increased pollution from increase in transport of goods around the world NB for KAA Level 4 candidates must refer to the global economy	(25)

Knowledge, application and analysis		
Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–4	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	5–8	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or superficial, two stage chains of reasoning only.
Level 3	9–12	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to apply economic concepts and relate them directly to the broad elements of the question with evidence integrated into the answer. Analysis is clear and coherent, although it may lack balance. Chains of reasoning are developed but the answer may lack balance.
Level 4	13–16	Demonstrates precise knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using appropriate examples. Analysis is relevant and focused with evidence fully and reliably integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Evaluation		
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–3	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	4–6	Evidence of evaluation of alternative approaches which is unbalanced leading to unsubstantiated judgements. Evaluative comments with supporting evidence/reference to context and a partially developed chain of reasoning.
Level 3	7–9	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and is critical of the evidence provided and/or the assumptions underlying the analysis enabling informed judgements to be made.

Q4.

Question Number	Indicative content	Mark
	Knowledge 4, Application 4, Analysis 8, Evaluation 9 Likely impact includes: • Higher prices for consumers, especially on goods/services that can't be produced domestically, e.g. bananas in the UK, increasing inflation globally • Higher prices for consumers due to domestic firms facing less competition from abroad • Less choice for consumers as imports become too expensive • Fewer firms may decide to export due to increased cost/bureaucracy to abide by, reducing global competition and therefore lower global GDP, higher global inflation • Reduction in comparative advantage globally leading to less productivity and less output • Deadweight welfare loss Evaluation might include e.g.: • Depends on levels of tariffs that countries introduce • May only be short-term trade wars and countries such as US and China could agree new terms • WTO can enforce global trade rules to ensure countries don't distort international trade • Comparative advantage can encourage over-dependence for a country (perhaps primary product dependency) • Protection of domestic industries helps to protect domestic employment and income, helping to reduce global inequality • Protection of infant industries to allow them time to grow and expand in order to benefit from economies of scale to compete internationally • Protection of an economy from a foreign country dumping products on the country- loss of jobs, output, etc. NB for KAA Level 4 candidates must refer to the global economy	(25)

Knowledge, application and analysis		
Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–4	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	5–8	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or superficial, two stage chains of reasoning only.
Level 3	9–12	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to apply economic concepts and relate them directly to the broad elements of the question with evidence integrated into the answer. Analysis is clear and coherent, although it may lack balance. Chains of reasoning are developed but the answer may lack balance.
Level 4	13–16	Demonstrates precise knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using appropriate examples. Analysis is relevant and focused with evidence fully and reliably integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Evaluation		
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–3	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	4–6	Evidence of evaluation of alternative approaches which is unbalanced leading to unsubstantiated judgements. Evaluative comments with supporting evidence/reference to context and a partially-developed chain of reasoning.
Level 3	7–9	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and is critical of the evidence provided and/or the assumptions underlying the analysis enabling informed judgements to be made.

Q5.

Question Number	Answer	Mark
(a)	Knowledge 2, Application 2, Analysis 1 Knowledge/Understanding: (1+1 or 2) marks Explanation of forward markets in currencies, e.g. • Firms buy their currency in advance (1) • Firms agree a fixed price (1) for purchase of foreign currency in the future (1) Application: (1+1) marks Reference to Extract A, e.g. • Currency 'has a big impact' on their business • Buying currency as soon as a large order is confirmed • 'The pound's post-Brexit referendum depreciation' Other application e.g. use of Figure 1. NB at least one piece of data must come from Extract A for the full 2 Ap marks. Analysis: (1) mark Linked development, e.g. • Enables firms to reduce risk/uncertainty • Firms can be certain about the cost of their imports in pounds	(5)

Question Number	Answer	Mark
(b)	Knowledge 2, Application 2, Analysis 2, Evaluation 2 Knowledge/understanding: 1+1 marks for identification of likely impacts of a fall in the value of sterling, e.g. • Import inflation change in cost of production for firms • Export/demand pull inflation • Changes in FDI • A change in unemployment • Economic growth • The will be an impact in the current account Analysis: 2 marks for linked explanation of these impacts (1+1 or 2 marks for one well developed explanation), e.g. • Fall in the value of sterling makes UK good appear cheaper to consumers in foreign countries when converted into their own currency (1) • Fall in the value of sterling makes UK imports more expensive to UK consumers when converted into pounds (1)	

	Application: (1+1) or 2 marks for reference to figure 1 and/or extract A, e.g. • Pound fell from around \$1.50 (1) rapidly to \$1.30 (1) after the Brexit vote • Pound fell further to a low over the period shown of just over \$1.20 (1) in October/November 2016 (1) • 'pound's post-Brexit referendum depreciation' (1) • Pound fell by approximately 12% after the vote to leave the EU (2) • Trend of depreciating pound (1) Evaluation: 2 marks for evaluation (1+1 or 2 marks for one well developed explanation) • Short-term impact - both figure 1 and extract A show how pound has risen towards mid/late 2017 • Price elasticity of demand for UK imports/exports • J-curve effect • Marshall-Lerner condition NB If the answer relates to a small rise in exchange rates e.g. since March 2017 then full marks can be awarded for a rise in exchange rate	(8)
--	--	------------

Question Number	Indicative content		Mark
(c)	Knowledge 2, Application 2, Analysis 2, Likely impacts on subjective happiness: • Consumers have less real income to spend on goods/services that affect their happiness • Consumers may worry more about the state of their personal finances • Consumers may worry about ability to continue paying mortgages/other debts NB For a level 3 answer there must be context from last paragraph of Extract C e.g. reference to credit cards and personal loan repayments		(6)
Level	Mark	Descriptor	
	0	A completely inaccurate response.	
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no link between causes and consequences.	
Level 2	3–4	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or the answer may lack balance.	
Level 3	5–6	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are applied appropriately to the broad elements of the question.	

Question Number	Indicative content		Mark
(c) continued	Evaluation 4 • Other factors affect happiness beside real income, e.g. leisure time, environment, etc. • Record low unemployment likely to lead to rising real incomes in future • Rises in real income may have a different effect on happiness than falls in real income • May be increased borrowing to make up for falling real incomes		(4)
Level	Mark	Descriptor	
	0	No evaluative comments.	
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/ reference to context. No evidence of a logical chain of reasoning.	
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.	

Question Number	Indicative content		Mark
(d)	Knowledge 4, Application 2, Analysis 2, Central Bank would use monetary policy (interest rates and quantitative easing) to control inflation: • Tighter monetary policy in response to rising inflation may create a conflict with objective of low unemployment- Phillips curve • Higher interest rates in response to rising inflation may create rising inequality if savers benefit and borrowers suffer • Higher interest rates in response to rising inflation may cause the sterling exchange rate to rise which can worsen the balance of payments on current account • Higher interest rates likely to reduce consumption/investment and therefore AD, so controlling inflation but reducing economic growth NB Accept expansionary and contractionary monetary policy		(8)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	3–5	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	6–8	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
(d) continued	Evaluation 4 There may not be a conflict between some macroeconomic objectives: • UK economy has had both low inflation and low unemployment recently so is the Phillips curve really still valid? • If incomes keep pace with inflation then inequality won't be an issue • Cutting QE reduces asset prices thereby reducing inequality • Depends on significance of change in monetary policy	(4)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Indicative content	Mark
(e)	Knowledge 3, Application 3, Analysis 3 Arguments that providing support to banks is the best policy: • Economy is dependent on financial system working smoothly • People could have lost their savings if banks had been allowed to fail, leading to massive drop in confidence • Potential for risk of depression had government not intervened • Government has recouped much of the money invested into bailing out the banks anyway- Government 'recovered every penny of its investment in Lloyds' NB Discussion of other policies, e.g. central bank regulation, can also be awarded as KAA NB Candidates may argue that providing support to banks is not the best policy as KAA and the opposite as evaluation	(9)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1-3	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	4-6	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	7-9	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content		Mark
(e) continued	Evaluation 6 Arguments that providing support to banks is not the best policy: • Huge expenditure for government that, for example in the case of the UK, already has a significant national debt- £65bn bailout of RBS and LBG. Will have to be repaid by future generations of taxpayers. • Moral hazard: will encourage reckless behaviour from the banks in the future, expecting a bailout again • Government looking unlikely to recoup losses from RBS for some time (in contrast to Lloyds) • Other policies, e.g. expansionary fiscal policy, may have been more effective NB Candidates may argue that providing support to banks is not the best policy as KAA and the opposite as evaluation		(6)
Level	Mark	Descriptor	
	0	No evaluative comments.	
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.	
Level 2	3–4	Evidence of evaluation of alternative approaches which is unbalanced. Evaluative comments with supporting evidence/reference to context and a partially-developed chain of reasoning.	
Level 3	5–6	Evaluative comments supported by relevant chain of reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.	

Q6.

Question Number	Answer	Mark
(a)	Knowledge 2, Application 1, Analysis 1 Knowledge/Understanding: Up to 2 marks for e.g. • Enabling growth/prevent recession • Providing temporary loans/credit • Promoting economic stability • Promoting international monetary cooperation • Promoting exchange rate stability Application: 1 mark for relevant example e.g. • \$57bn lent to Argentina • Money helps to stabilise currency • Money enables Argentinian government to continue repayments on its debt • Other relevant examples Analysis: Up to 1 mark for e.g. • Countries such as Argentina relied on IMF as it would be too risky for financial markets to lend to them • IMF will insist on reforms to economy as part of financial assistance	(4)

Question Number	Answer	Mark
(b)	The only correct answer is B <i>A is not correct because that refers to an increase in the value of the currency</i> <i>C is not correct because that refers to direct intervention in the currency markets</i> <i>D is not correct because that refers to an increase in the value of the currency</i>	(1)

Q7.

Question Number	Answer	Mark
(a)	Knowledge 2, Application 2, Analysis 1 Knowledge/Understanding: Up to 2 marks for e.g. • Guaranteed minimum price (1) • Reduced fluctuations in income/price (1) • Fairtrade farmers/growers/suppliers receive a higher price for their crops (1) • Fairtrade 'premium' paid to farmers/growers/suppliers (1) • Extra financial support for farmers/growers/suppliers (1) • Increased income/profit for farmers/growers/suppliers (1) Application: Up to 2 marks for e.g. (1+1 OR 2) • 44% of Fairtrade premium was spent on improving business administration and infrastructure • 45% was spent on investing in farm equipment, training, and funding • Price volatility for farmers • Fragile incomes for farmers • Fluctuating world cocoa prices • Diversification into other crops • Median annual income for cocoa farmers in Ivory Coast of US\$2 600/not a living income • Even tripling farm output would not provide a cocoa farmer with a living income Analysis: Up to 1 mark for e.g. • Fairtrade is designed to support people in developing countries (1) • Farmers can use additional income to invest into their business (1) • Fairtrade is democratic in the sense that farmers can choose how to spend their Fairtrade premium money (1) • Alternative to aid using the market system (1)	(5)

Question Number	Answer	Mark
(b)	Knowledge 2, Application 2, Analysis 2, Evaluation 2 Knowledge/Understanding: Relevant methods identified (1+1), e.g. • Diversification • Invest in technology/machinery • Improved use of resources • Increased processing of cocoa beans within the country Application: 2 marks (1+1 OR 2) for reference to the data/candidates' own knowledge, e.g. • World cocoa prices plunged by more than a third in 2017 • Average cocoa farm yields only half of what could be achieved • Fertilisers/replanting/tractors to increase output/yield • Diversification into livestock/other crops • Producing chocolate bars from cocoa beans	
	Analysis: Linked development of each factor (1+1), e.g. • Diversify into other crops to reduce impact of fluctuating prices • Machinery can speed up harvesting and reduce labour costs • Fertiliser can increase output of cocoa so farmers have more to sell • <i>Adding value</i> by processing beans Evaluation: 2 marks for two evaluative comments OR 2 marks for identification and linked development of one comment Evaluative comments (1+1), e.g. • Significance of different methods • Improvements will only occur in the long term • Increasing cocoa yields will further reduce cocoa prices	(8)

Question Number	Indicative Content	Mark
(c)	Knowledge 2, Application 2, Analysis 4 • Fluctuating prices make it hard for farmers to plan ahead for future purchases of seeds, equipment, etc. and will discourage investment into the farm to improve productivity • Falling cocoa prices reduce profits for farmers • Falling cocoa prices reduce the Ivory Coasts' terms of trade, affecting their ability to buy important imports such as capital equipment • Fluctuating current account • Cocoa is over half of Ivory Coast's exports and thus is a significant part of the country's economy and changes will have a big impact on AD NB For a Level 3 response candidates must refer specifically to Figure 2	(8)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	3–5	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	6–8	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative Content	Mark
(c) continued	Evaluation 4 - Ivory Coast has comparative advantage in cocoa (climate, soil, etc.) so they should specialise in this to maximise output - Growth of schemes such as Fairtrade will help in the future	(4)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1-2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3-4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Indicative Content	Mark
(d)	Knowledge 2, Application 2, Analysis 2, Possible policies might include e.g.: - Supply-side policies to improve productivity such as improved education or healthcare will make workforce more efficient and thus reduce per unit costs to better compete with cheaper imports (allow more than one supply-side policy) - Deregulation policies (e.g. labour laws) to reduce production costs for firms and therefore they will be able to compete on price with other African countries better - Investment in infrastructure to reduce transport costs for exporters - Subsidies provided by the government to help firms adjust to new competition, e.g. could be used to purchase new, more efficient machinery - Demand-side policies such as reduction in taxes on businesses to reduce their costs and increase competitiveness on price	(6)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no link between causes and consequences.
Level 2	3–4	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or the answer may lack balance.
Level 3	5–6	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are applied appropriately to the broad elements of the question.

Question Number	Indicative Content	Mark
(d) continued	Evaluation 4 • Education investment will take a long time until those students enter the workforce • Opportunity cost for the government of investment • Potential side effects of wage-related policies	(4)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/ reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Indicative content	Mark
(e)	Knowledge 3, Application 3, Analysis 3 • Trade creation as a result of joining the trading bloc • Increased specialisation & trade for countries & their firms, following theory of comparative advantage so total output of the economy can increase. Could potentially be explained diagrammatically or with a numerical example • Higher incomes for workers in the countries thanks to increased demand for the country's exports pushing up wages • Increase in jobs as domestic firms now have much larger market to sell their products to, improving standard of living for citizens of the countries NB For a Level 3 response candidates must refer specifically to benefits for sub-Saharan African countries	(9)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1-3	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	4-6	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	7-9	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
(e) continued	Evaluation 6 • Trade diversion resulting in loss of efficiency as trade switches to less efficient producers within the trading bloc • More integration means financial crises will spread more quickly across the trading bloc • Loss of output due to cheaper competition from lower wage cost countries	(6)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evidence of evaluation of alternative approaches which is unbalanced. Evaluative comments with supporting evidence/reference to context and a partially-developed chain of reasoning.
Level 3	5–6	Evaluative comments supported by relevant chain of reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Q8.

Question Number	Answer	Mark
(a)	Knowledge 2, Application 2, Analysis 1 Knowledge/Understanding: Up to 2 marks for e.g. • Absolute poverty: Lacking basic necessities to survive (1) • Relative poverty: Relatively poor compared to rest of your country (1) Application: Up to 2 marks for e.g. (1+1 OR 2) • Absolute poverty: World Bank definition: \$1.90 a day (1) PPP values (1) • Relative poverty: 60%/50% (1) below median household income in your country (1) • Reference to Figure 1 or Extract A/B (1+1) Analysis: Up to 1 mark for e.g. • Absolute poverty can decline at the same time as relative poverty is increasing (1) • There may be relative poverty in a country but not necessarily absolute poverty (1)	(5)

Question Number	Answer	Mark
(b)	Knowledge 2, Application 2, Analysis 2, Evaluation 2 Knowledge/Understanding: Relevant factors identified (1+1), e.g. • Level of education • Level of healthcare • Level of infrastructure • Level of trade • Capital flows • Civil war • Drought • Poor governance • Liberalisation of trade/tariff cuts Analysis: Linked development of each factor (1+1), e.g. in Sub-Saharan Africa • Relative lack of education means a less skilled and therefore less productive workforce (1) • Relative lack of healthcare means people spend more time absent from work with illnesses and therefore reduces productivity (1) • Relative lack of infrastructure makes it more difficult and therefore expensive to move goods around the country to markets (1)	

	Application: 2 marks (1+1) for reference to the data/candidates' own knowledge, e.g. • Extract B: two thirds of 780 million illiterate adults are women • Extract B: poor people- more malnutrition, lower odds of receiving health care • Absolute poverty has declined far more rapidly in East Asia than Sub-Saharan Africa Evaluation: 2 marks for two evaluative comments OR 2 marks for identification and linked development of one comment Evaluative comments (1+1), e.g. • Significance of different factors • Improvements will only occur in the long term	(8)
--	---	------------

Question Number	Indicative Content	Mark
(c)	Knowledge 2, Application 2, Analysis 4 Possible policies might include e.g.: • Fiscal policy: increase people's disposable incomes, increase employment and so reduce downsides of low wages and unemployment due to foreign competition. A more redistributive tax/welfare system to reduce inequality/poverty caused by globalisation. • Expansionary monetary policy: cut in interest rates, rise in availability of credit, allows businesses to borrow for investment to help combat increased foreign competition. • Supply side policies, e.g. improved education, healthcare, infrastructure, etc.: Improvements in these will boost productivity and this boost GDP as well as meaning firms would be more likely to be able to pay higher wages. Higher productivity would enable firms to better compete with foreign competition in the form of lower prices. Candidates may discuss in the context of developed or developing countries NB To access Level 3 there must be reference to two valid macroeconomic policies, apart from protectionism	(8)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	3–5	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	6–8	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative Content	Mark
(c) continued	Evaluation 4 • Impact of expansionary fiscal policy on budget deficit • If business confidence is low, expansionary monetary policy may not lead to increased borrowing for investment • Supply side policies may not be effective in the short run or have public sector cost implications • Effectiveness of policies, e.g. lack of consumer confidence	(4)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/ reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Indicative Content	Mark
(d)	Knowledge 2, Application 2, Analysis 2, • Incentive to work hard in order to receive higher reward will help increase economic growth which can result in reduced absolute poverty • More innovation due to the profit motive for firms and inventors leads to more competitive industry and faster economic growth • Lower taxes or less redistribution may encourage entrepreneurs to relocate to the country • Reference to rising living standards in a largely market based economy, e.g. UK, US NB Arguments for or against the benefits of inequality can be taken as KAA or evaluation	(6)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no link between causes and consequences.
Level 2	3–4	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or the answer may lack balance.
Level 3	5–6	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are applied appropriately to the broad elements of the question.

Question Number	Indicative Content	Mark
(d) continued	Evaluation 4 • Inequality reduces consumer confidence so less consumption, increase in saving. Aggregate demand may fall as a result. • Excessive inequality can lead to more crime, poorer healthcare, etc. • Low pay can act as a disincentive to seek employment and economic growth suffers as a result. NB Arguments for or against the benefits of inequality can be taken as KAA or evaluation	(4)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Indicative content	Mark
(e)	Knowledge 3, Application 3, Analysis 3 The role of the financial sector in the growth and development in developing countries includes: • facilitating saving so banks have more funds for lending, facilitating investment and therefore growth • promoting lending to enable more investment in the economy • exchanging currencies- enabling firms to imports parts and materials- often more cheaply- and also enabling them to export - helping to increase size of their market • providing a market for equities • Harrod-Domar model • Microfinance • Central banks/international organisations NB For a Level 3 response candidates must refer specifically to growth/development in a developing country/countries/regions	(9)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–3	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	4–6	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	7–9	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
(e) continued	Evaluation 6 • Clear rule of law required for financial sector to develop • Risk of corruption • Risk of market failure in financial markets • Lack of financial literacy in developing countries may limit potential • Other factors may play a larger role, e.g. healthcare, infrastructure, education	(6)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evidence of evaluation of alternative approaches which is unbalanced. Evaluative comments with supporting evidence/reference to context and a partially-developed chain of reasoning.
Level 3	5–6	Evaluative comments supported by relevant chain of reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Q9.

Question Number	Indicative content	Mark
	Knowledge 4, Application 4, Analysis 8 Evaluation 9 Effects might include: • Trade creation: domestic production is replaced with more efficient imports from a member of the trading bloc • More trade within the trade bloc • Increased exports due to the larger market firms can now enjoy • Increased imports due to removal of protectionist barriers that previously existed between member countries • Increased specialisation/economies of scale as can now sell to a larger market • Use of comparative advantage to support argument Diagrammatic analysis may be used to aid explanation e.g. tariff diagram	
	Evaluation points might include: • Trade diversion: Due to protectionist measures imposed on non-member countries, countries may purchase imports from less efficient countries within a trading bloc instead of more efficient ones outside of the bloc • Products may still be cheaper from outside the trading bloc due to economies of scale/lower production costs • Possibility for countries to benefit from bilateral trade deals without needing to join a trading bloc • Other factors affect ability to import/export such as quality of infrastructure at airports/ports • Possible conflict with WTO rules • Only within Africa so effect may be limited NB For a level 4 answer candidates must use examples of real trading blocs NB For a level 4 answer candidates must make explicit reference to trading patterns	(25)

Knowledge, application and analysis		
Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–4	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	5–8	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or superficial, two stage chains of reasoning only.
Level 3	9–12	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to apply economic concepts and relate them directly to the broad elements of the question with evidence integrated into the answer. Analysis is clear and coherent, although it may lack balance. Chains of reasoning are developed but the answer may lack balance.
Level 4	13–16	Demonstrates precise knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using appropriate examples. Analysis is relevant and focused with evidence fully and reliably integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Evaluation		
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–3	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	4–6	Evidence of evaluation of alternative approaches which is unbalanced leading to unsubstantiated judgements. Evaluative comments with supporting evidence/reference to context and a partially-developed chain of reasoning.
Level 3	7–9	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and is critical of the evidence provided and/or the assumptions underlying the analysis enabling informed judgements to be made.

Q10.

Question Number	Answer	Mark
(a)	Knowledge 2, Application 2, Analysis 1 Knowledge and analysis (3): • Definition of opportunity cost as the next best alternative foregone (1) • Governments have to pay interest (1) at the expense of other expenditure (1) • Servicing means paying back interest and minimum capital requirements (1) e.g. to prevent a default, loss of confidence, other repercussions (1) • The debt is external (1), and in this case owed by governments as they have been borrowing from abroad (1) • Use of PPF to show opportunity cost may be awarded as analysis (1) Application (2 marks for 1 point, or 1 + 1): e.g. • Debt service payments above 20% of G (1) are unsustainable (Extract D) (1) • £20billion raised 2010-2015 (Extract D) (1) • Commodity prices soaring and foreign loans available' (Extract D) (1) • 'Heavy repayment schedules at a time of low commodity prices' (Extract D) (1) • Governments have taken to 'private debt too eagerly' (Extract D) (1) • 'Median level of debt risen from 34% to 48% in 2017' (Extract D) (1) is heavy because of 'low tax base' (Extract D) (1) • High levels of poverty – half of the 26 million people (1), so many feel the effects of reduced government expenditure (Extract E) (1) • 'non-existent tuna fleet' or other hidden debt (Extract D) or corruption (1) at the expense of other government spending (1) • Opportunity costs applied to any developing country, e.g. spending on poverty alleviation, education and health spending or recent cyclone April 2019 (1). Award a maximum of 1 application mark if there is no reference to Extract D	(5)

Question Number	Answer	Mark
(b)	Knowledge 2, Application 2, Analysis 2, Evaluation 2 Knowledge/implicit understanding of two reasons why manufacturing firms stay small, (1+1) e.g. • Size of market/lack of access to export markets/low export earnings due to lack of demand • Absence of economies of scale, or insufficient incentive or ability to grow (apart from access to financial) • Problems of human capital, e.g. lack of educated workforce • Lack of infrastructure making expansion into new areas difficult, or small markets • Actions of foreign firms to foster dependency • Government or international actions to make it hard for firms to grow • Lack of TNC involvement in Mozambique/volatility of currency/capital flight • Firms want to remain close to customers- meet needs with specific goods. • Firms might be manufacturing niche products with inelastic demand and high-income elasticity • Small firms more able to manufacture and sell through selling online and have small assets. • Perfect / monopolistic competition characteristics, e.g. low barriers to entry • Non-economic factors, e.g. natural disasters, political tensions, drought • Cost of finance, cost of servicing loans, financial economies of scale and scope. Do not allow access to finance.	
	Application (1+1 or 2): e.g. • Further depreciation of the metical (Extract E) • Lack of economic stability (Extract E line 26) • Slowdown in FDI (Extract E) • Depressed global demand (Extract E) • Low levels of employment in the sector (Extract E) may imply lack of skilled workers • High interest rates (Fig. 2 and Extract E line 14) • High import costs (Extract E line 15) • Needs urgently to improve its investment environment and confidence (Extract E line 17) • Large scale emigration (Extract E) • High numbers of people 'below the poverty line' (Extract E line 6) mean the market/incomes are small • 'Economic dependence on South Africa' (Extract E) may limit prices/market power of firms.	

	Analysis (1+1) • Development of each point, up to 1 mark for each valid factor Evaluation (2 marks for any relevant point, two points 1+1): • The development of the gas fields (Extract E) will 'transform the economy' • Pick up in coal and electricity (Extract E) which are probably larger firms and may have impact on manufacturing • may consider whether this is because of choice or lack of opportunity • Long term 'prospects are promising' (Extract E, line 20) e.g. sustainable agreement, gas fields production in 2020s or other initiatives such as trade blocs NB Cost of finance, financial economies of scale etc are allowed. It is only ACCESS to finance e.g. unavailability of microfinance, savings gap, loss of external lenders which is excluded. NB Access to finance <i>may</i> be credited as part of the evaluation but not as KAA	(8)
--	--	-------------------

Question Number	Indicative content	Mark
(c)	Knowledge 2, Application 2, Analysis 4 • Microfinance meaning and role • Plugs the savings gap / Harrod-Domar model • Enables firms to be set up – fixed or start-up costs • enables firms to invest in human capital and overcome primary product dependency • Use of Figure 3 to illustrate size and importance of microfinance operations • Use of Extract F – e.g. '100 000 borrowers', many new business start-ups which could not have gained finance from any other source', 'unfulfilled demand for microfinance' • How borrowers benefit – small firms can be set up or expanded, allowing firms to gain capital and materials to set up businesses, provide more employment, lead to improved living standards • Borrowers lack collateral so cannot borrow from banks in the normal way • The money is in small amounts £200 to £300, paid back regularly and over a short period of time, on which basis the firm forms a business plan for which the lender will approve or advise • Microfinance allows firms to form without the stigma of aid or the dependence of FDI • Use of cost/revenue analysis to support arguments (perfect/monopolistic competitive market) • Macro analysis (AD/AS) must link back to borrowers, e.g. increased standard of living, allows firms to expand/invest NB For Level 3, answers must link to borrowers NB The answer can take the form that there are more costs than benefits as part of the KAA, using the benefits as the evaluation	(8)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	3–5	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	6–8	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
(c) continued	Evaluation 4 • Use of Figure 2 to show high base rates and Figure 3 to show average 75% APR on microfinance • Large potential for expansion (Extract F) • May encounter lack of demand as more than half of the population live below the poverty line • Weak infrastructure does not allow borrowers to access markets • Alternatives to microfinance could be considered, e.g. aid, FDI, debt relief • Reasons why microfinance can be damaging to borrowers, e.g. pressure on women (98% of borrowers), over-indebtedness, poor guidance given to borrowers, macro-finance is needed for economies of scale, people borrowing multiple times, for uses which are social not business orientated. • Large numbers of people setting up similar businesses/highly competitive e.g. food stalls, so profits tend to be low/need for dynamic efficiency • Funds from private banks very different from NGOs – banks might be more cautious, and therefore more likely to succeed, might be better advice, support from specialists, softer terms from either institution might lead to moral hazard	(4)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Indicative content	Mark
(d)	Knowledge 4, Application 4, Analysis 8, Evaluation 9 Microeconomic influences may include: • Labour force and other demographic factors e.g. emigration of skilled/educated workers, disease, low life expectancy • Small firms with low levels of capital • Low levels of personal saving/high levels of personal debt • Primary product dependency • Volatility of commodity prices • Debt – although do not award access to credit and banking. Allow arguments based on dependency or opportunity cost, for example • Lack of infrastructure/other capital • Absence of property rights • Non-economic factors e.g. natural disasters, social problems • Joint ventures with global companies Macroeconomic influences may include: • Trade liberalisation – may refer to tariffs or trade agreements • Role of FDI e.g. the tuna fleet cover-up dries up FDI • Government policy failure, e.g. weak expansion in fiscal policy, high interest rates, lack of subsidies, privatisation, interventionist strategies, e.g. management of exchange rate, buffer stocks • Actions of other international institutions e.g. IMF or NGOs • Macroeconomic stability, e.g. rate of inflation (might refer to Figure 2), rate of economic growth, exchange rate (metical at a 'new low')	

	Possible evaluation points include: • Degree to which the factors are inevitable • Signs of improvements in passages • Some factors are temporary, e.g. fall in commodity prices such as coal and drought affecting production and exports to other countries within Africa NB Do not award KAA for arguments based on ACCESS TO credit and banking, although this approach is permitted as part of the evaluation NB for a Level 4 response there must be micro and macro factors (s). There must be reference to both growth and development for Level 4	
--	---	--

	PPD/ Harrod-Domar/ debt/ aid/ debt relief/ cost of credit/ non-economic factors/currency issues / competitiveness index can be used as micro or macro.	(25)
--	--	-------------

Knowledge, application and analysis		
Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–4	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	5–8	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or superficial, two stage chains of reasoning only.
Level 3	9–12	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to apply economic concepts and relate them directly to the broad elements of the question with evidence integrated into the answer. Analysis is clear and coherent, although it may lack balance. Chains of reasoning are developed but the answer may lack balance.
Level 4	13–16	Demonstrates precise knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using appropriate examples. Analysis is relevant and focused with evidence fully and reliably integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems covering both microeconomic and macroeconomic factors. The answer demonstrates logical and coherent chains of reasoning.

Evaluation		
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–3	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	4–6	Evidence of evaluation of alternative approaches which is unbalanced leading to unsubstantiated judgements. Evaluative comments with supporting evidence/reference to context and a partially-developed chain of reasoning.
Level 3	7–9	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and is critical of the evidence provided and/or the assumptions underlying the analysis enabling informed judgements to be made.

Question Number	Indicative content	Mark
(e)	Knowledge 4, Application 4, Analysis 8 Evaluation 9 Microeconomic effects may include: • On people with debt (better off) and savings (worse off) • On people with fixed incomes – may refer to falling real incomes • On firms' profits, e.g. that face rising costs and if they cannot raise prices they will face falling profits, or falling sales as consumers delay purchases. This might be illustrated with cost/revenue diagrams. • On firms' costs if they face rises in interest rates as a policy corollary of high inflation, which might lead to lower profits. This might be illustrated with cost/revenue diagrams. • Opportunity cost, e.g. effects on a government's spending if costs of servicing debts fall • Effect on labour markets e.g. people might work more hours to cover increased cost of living NB do not award fall in profits or revenue or rise in costs unless a valid chain of reasoning is given Macroeconomic effects may include: • International competitiveness and balance of payments, between African countries and with the rest of the world. Exports likely to fall and imports likely to rise • Distribution of income and wealth • Confidence and investment in financial markets • Policy responses, e.g. rises in interest rates and effects on AD • Shift in AS and/or AD may be used as part of the analysis • High inflation might deter Investment and FDI	

	NB do not award rise in unemployment/fall in growth unless a valid chain of reasoning is given Possible evaluation points include that the effect depends on: • Whether wages rise in line with inflation • The degree of inflation, and the policy and international responses. • The PED of countries buying the African exports • The PED of importing countries as imports become relatively cheap	
	• Whether African countries are trading with each other the effects of inflation may be cancelled out e.g. use of Figure 2 to show neighbouring countries with higher inflation rates • Whether asset prices rise as to the redistributive impact • Depends on whether this is a long-term inflation problem- could be short term e.g. linked to commodity price rises. Only a problem if it is sustained. • The figures are in one month in July 2017 and may not reflect inflation story for full year. Time series data may be more useful. • Depends on the type of inflation – e.g. cost push or demand pull. • Impact on exchange rates e.g. higher inflation may erode the value of the currency. This might cancel out the impact on competitiveness NB for a Level 4 answer there must be reference to the context of African countries (not just one) NB for a Level 4 response there must be micro and macro effect (s). Costs/ shift in PPF/ currency/labour markets/competitiveness etc. can be used as micro or macro.	(25)

Knowledge, application and analysis		
Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–4	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	5–8	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or superficial, two stage chains of reasoning only.
Level 3	9–12	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to apply economic concepts and relate them directly to the broad elements of the question with evidence integrated into the answer. Analysis is clear and coherent, although it may lack balance. Chains of reasoning are developed but the answer may lack balance.
Level 4	13–16	Demonstrates precise knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using appropriate examples. Analysis is relevant and focused with evidence fully and reliably integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems covering both microeconomic and macroeconomic factors. The answer demonstrates logical and coherent chains of reasoning.

Evaluation		
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–3	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	4–6	Evidence of evaluation of alternative approaches which is unbalanced leading to unsubstantiated judgements. Evaluative comments with supporting evidence/reference to context and a partially-developed chain of reasoning.
Level 3	7–9	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and is critical of the evidence provided and/or the assumptions underlying the analysis enabling informed judgements to be made.

Q11.

Question Number	Indicative content	Mark
	Knowledge 4, Application 4, Analysis 8, Evaluation 9 Likely impacts include: • UK exports are now cheaper when priced in dollars, so should mean an improvement in UK price competitiveness leading to increased demand for UK exports and AD <i>However depends on quality of UK exports or if US firms/consumers demand what we are producing</i> • UK imports from the US are now more expensive so likely to lead to less demand for US imports which improves net trade and therefore AD <i>However, depends if there are domestic alternatives to the US imports. If not prices will simply rise</i> • Imported inflation: as prices of imports rise, particularly of necessities, then UK inflation will increase. • Lower exchange rate might attract inward investment with multiplier effects on AD • Other factors which cause growth might be considered as more than one factor • Diagrammatic analysis may be used (e.g. AD/AS) Other evaluative comments may include e.g.: • Imported inflation will be a particular problem if wages do not increase in line with inflation. • Depends if this is a temporary fall or a permanent adjustment to the exchange rate • Depends on UK exchange rate with other currencies as well • US is a significant trade partner for the UK so the impact is likely to be significant • Consideration of the Marshall-Lerner condition and J curve effect • Other factors which cause growth might be considered as evaluative comments • EU is a very significant trading partner for the UK and thus the impact is likely to be significant	(25)

Knowledge, application and analysis		
Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–4	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	5–8	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or superficial, two stage chains of reasoning only.
Level 3	9–12	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to apply economic concepts and relate them directly to the broad elements of the question with evidence integrated into the answer. Analysis is clear and coherent, although it may lack balance. Chains of reasoning are developed but the answer may lack balance.
Level 4	13–16	Demonstrates precise knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using appropriate examples. Analysis is relevant and focused with evidence fully and reliably integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Evaluation		
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–3	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	4–6	Evidence of evaluation of alternative approaches which is unbalanced leading to unsubstantiated judgements. Evaluative comments with supporting evidence/reference to context and a partially developed chain of reasoning.
Level 3	7–9	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and is critical of the evidence provided and/or the assumptions underlying the analysis enabling informed judgements to be made.

Q12.

Question Number		Mark
(a)	Knowledge 2, Application 2, Analysis 1 Knowledge and analysis: • Terms of trade definition or formula e.g. index of export prices / index of import prices x 100 (1) • Import prices have risen (1) (e.g. because exchange rate fell) relative to export prices (1) • Import prices stay constant (1) relative to main export prices falling (1) • Fewer imports can be bought for the same amount of exports (2) Application 2 marks for e.g. • It is likely to have worsened (1) • Coal is the main export (1), 11% of revenues (1) • Export prices/commodity prices have fallen Figures 4 & 5 e.g. coal prices have fallen Fig 4 (1+1) • Export price of coal has fallen from US\$125 to US\$50 per tonne (1+1) • The exchange rate (rupiah) has fallen (1) 30% (1) NB award application if the answer says that the terms of trade falls, goes down, or that it is a negative change	(5)

Question Number		Mark
(b)	Knowledge 2, Application 2, Analysis 2 Evaluation 2 Diagram (2) Reserve 2 marks for costs and revenue diagram. This can be awarded as 2 application marks or 1AN + 1AP. Knowledge and analysis (1+1): e.g. • Increasing efficiency resulting from investment lowers costs for firms (K) which means AC falls – might also show fall in MC (A) • Profit increases (K) with new area shown on diagram linking the new MC=MR with the AR and new AC (A) Application (2 or 1+1): answer relates to the output of farmers increasing relative to input, e.g. Productivity of each farm increases (1) as rice output doubles (1); Plans for 65 dams, 16 already under construction (1) Or: 'two harvests a year' (1) means more output from same fixed land/factor (1)	

Diagram e.g. shows a decrease in AC (if fixed costs) or decrease in AC and MC (if variable costs) e.g. as shown below. The diagram must be **consistent** with the description, although shift/non shift in MC might be implicit.

- 1 mark for correct shift in cost (relevant to answer given) and
- 1 mark for new correct profit area shown.

Diagram may show a fall in costs and/or an increase in revenue **if linked** to double the number of harvests, or a decrease in revenue **if linked** to falling worldwide prices, more firms entering the market. Diagram may be perfect competition.

Evaluation (2 marks for any relevant point, or two points 1+1)

- The investment is taking many years and may not be completed
- Governments might increase tax on farmers to compensate for increased costs of dam investment
- The farmers might face other increased costs as output rises e.g. law of diminishing returns
- There may be more efficient and effective ways of increasing output, e.g. better technology, fertiliser
- Increased world supply could lower the price per unit, and with low PED the revenue and therefore profit could fall.

(8)

Question Number	Indicative content	Mark
(c)	Knowledge 2, Application 2, Analysis 4 - Specific impact on Indonesia: - Recovery from the Tsunami / financial crisis (Extract D); - impact of reconstruction investment; - impact on the likely poverty trap that many Indonesians will find themselves in; - the impact of the cash transfer; - the long term problems of conditional loans; - the long term impact of constructing two new power stations (via Japan's development agency) - lack of tax revenue due to inefficient tax collection and low tax base (10%) Ext E. - Aid is the transfer of resources on concessional terms – allow wide variety of aid e.g. from international institutions such as the IMF/World Bank, from NGOs, concessional loans (interest paid is below market rates, or with softer repayment conditions than in free market) - Aid is being used to pay for education and health, transfers of cash, \$2.3 billion a year - Consideration of macro effects, e.g. multiplier effects, shifts in AD, equality - Consideration of development theory, e.g. Harrod-Domar, plugging the savings gap / foreign exchange gap	(8)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	3–5	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	6–8	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
(c) continued	Evaluation 4 • Aid can lead to moral hazard, over-dependence, corruption, poor governance e.g. Ext E tax incentives offered by Mr Widodo might widen inequality • Dependency theory might be use to show the problems of aid • Alternative to aid e.g. debt relief, microfinance, investment by TNCs, loan from the World Bank • Conditions attached to aid may have negative consequences, e.g. not clear that the loans offered in Extract D are concessionary, or interest rates may still have a high opportunity cost • Aid may be more effective if used in conjunction with supply side measures • The concessionary loans need to be paid back, Extract E. These can increase a country's indebtedness and exposure to risk, and could affect government finance, where tax collection is inefficient and tax base (10%) is small.	(4)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Indicative content	Mark
(d)	Knowledge 4, Application 4, Analysis 8, Evaluation 9 Microeconomic effects might include: • Producer revenue from exports is volatile from primary products. Firms might close down when prices fall. • Other primary product dependency arguments – a diagram showing low PED and PES might be used. • Labour market – impact on wages and employment • Diagram showing effects on revenue, consumer/producer surplus, price, profits might be used • Local firms might go out of business Macroeconomic effects might include: • Balance of payments problems – Prebisch-Singer (declining terms of trade) might be used for products such as coal in reference to falling prices (NB this only addresses part of the volatility issue) • Government finances – the government might rely on export taxes • Primary product dependency/over-dependence on one sector can cause problems if natural disaster or changes in worldwide demand, e.g. China slowdown • Dutch Disease impact on exchange rate – e.g. higher value of rupiah when coal prices rise • Increased use of protectionism • Inflation (Extract E) • Limits investment (might link to Harrod Domar model) • Limits government and private expenditure on health and education	

	NB Accept infrastructure, labour markets, tax incentives, inequality and poverty as micro or macroeconomics, if developed appropriately. NB for a Level 4 answer there must be reference to the context of <i>Indonesia</i> and <i>volatility</i>. Evaluation points might include: • Degree to which GDP is dependent on commodity exports. Data suggests Indonesia GDP has not suffered as much as other countries from the fall in commodity/coal prices (Extract E) and Figures 4 and 5 • Depends on the PED and/or YED of importing countries for the specific commodities • Fiscal expansion (Extract E) has offset the effects of falling prices • There may be no alternative to primary product dependency/Lewis model is flawed • Comparative advantage argument • The reduction in prices might be short term/there are benefits to rising prices/depends if it is just one commodity which distorts the exchange rate for other commodities ('Dutch disease') • Buffer stock schemes • Financial markets can help limit effects, e.g. through futures contracts • Improved infrastructure can help farmers be more aware of price trends and take products to markets at high prices	(25)
--	--	--------------------

Knowledge, application and analysis		
Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–4	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	5–8	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or superficial, two stage chains of reasoning only.
Level 3	9–12	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to apply economic concepts and relate them directly to the broad elements of the question with evidence integrated into the answer. Analysis is clear and coherent, although it may lack balance. Chains of reasoning are developed but the answer may lack balance.
Level 4	13–16	Demonstrates precise knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using appropriate examples. Analysis is relevant and focused with evidence fully and reliably integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems covering both microeconomic and macroeconomic factors. The answer demonstrates logical and coherent chains of reasoning.

Evaluation		
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–3	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	4–6	Evidence of evaluation of alternative approaches which is unbalanced, leading to unsubstantiated judgements. Evaluative comments with supporting evidence/reference to context and a partially developed chain of reasoning.
Level 3	7–9	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and is critical of the evidence provided and/or the assumptions underlying the analysis enabling informed judgements to be made.

Question Number	Indicative content	Mark
(e)	Knowledge 4, Application 4, Analysis 8, Evaluation 9 Microeconomic effects might include: • on firms e.g. from quicker planning approvals, tax incentives locating to special economic zones, better roads and ports • improved quality of labour force e.g. from education and health reforms (Extract D) • lower bureaucratic costs • lower prices as competition increases Macroeconomic effects might include: • lower inflation (might be shown by rightwards or downwards shift of LRAS) • improved balance of payments as exports improve • infrastructure improvements attracts FDI • indirect increased AD via G, I or X, and multiplier effects • increase in real GDP	
	NB Accept infrastructure, labour markets, tax incentives, inequality and poverty as micro or macroeconomics if developed appropriately. NB for a Level 4 answer there must be reference to the context of <i>Indonesia</i>. Evaluation points might include: • impact will depend on success of policies – may refer to previous underinvestment in the Extract E, or higher investment in neighbouring countries • Some supply side policies conflict with other policies, e.g. fiscal and there is a fiscal constraint by law (Extract E) • depends on whether supply side policies are interventionist or market-based as to whether there will be an inflationary effect, crowding out effect etc. • labour market still appears to be inflexible (Extract E) • collecting tax to pay for the capital spending or repayment of loans can have negative impact, e.g. government failure, aid dependency	(25)

Knowledge, application and analysis		
Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–4	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	5–8	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or superficial, two stage chains of reasoning only.
Level 3	9–12	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to apply economic concepts and relate them directly to the broad elements of the question with evidence integrated into the answer. Analysis is clear and coherent, although it may lack balance. Chains of reasoning are developed but the answer may lack balance.
Level 4	13–16	Demonstrates precise knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using appropriate examples. Analysis is relevant and focused with evidence fully and reliably integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems covering both microeconomic and macroeconomic factors. The answer demonstrates logical and coherent chains of reasoning.

Evaluation		
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–3	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	4–6	Evidence of evaluation of alternative approaches which is unbalanced, leading to unsubstantiated judgements. Evaluative comments with supporting evidence/reference to context and a partially developed chain of reasoning.
Level 3	7–9	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and is critical of the evidence provided and/or the assumptions underlying the analysis enabling informed judgements to be made.

Q13.

Question Number	Indicative content	Mark
(a)	Knowledge 2, Application 2, Analysis 1 Knowledge and analysis: up to 3 marks. Points might include: • Lewis model suggests that countries dependent on agriculture would see productivity gains and growth if they moved to industrialisation • unproductive agriculture moves to more productive and profitable manufacturing • reference to law of diminishing returns, e.g. farming has a very low marginal productivity • surplus labour moving to industrial production has very low opportunity cost • productivity gains in industrialisation means that the sector can grow (linear growth model) • dual economy of rural agriculture and urban manufacturing/reference to migration/mobility of labour • model of structural change e.g. increasing the industrial sector rather than agriculture • growth in industry and manufacturing can be achieved without reducing agricultural • everyone becomes better off than they were • movement away from subsistence sector (non-market transactions/informal sector/hidden economy) Application (2 marks for 1 point, or 1 + 1) e.g. • flower farming is more productive than traditional farming, and involves higher skills and technology than other agriculture • industrialisation can still involve agriculture • 'do more manufacturing or stay poor' • 'industries without smoking chimneys' • Kenya and processing of flowers • well paid jobs with greater opportunities	(5)

Question Number	Indicative content	Mark
(b)	Knowledge 2, Application 2, Analysis 2 Evaluation 2 Knowledge/implicit understanding of two factors, which could either improve or worsen development (1 + 1) e.g. • health care issues e.g. child mortality rates/changes in number of children • falling birth rate • fertility changes/other reproductive issues • increased life expectancy • higher school enrolment/literacy rates/other education • urbanisation • falling dependency ratio • larger population • larger workforce • declining family size Application: (1 + 1 or 2): e.g. • Figure 2 shows 53.7 million population in 2020 • Kenya's population has doubled over the last 25 years, to about 40 million people (Fig 2) • due to high fertility in previous decades, there are many more families in Kenya today (Ext E) • life expectancy is projected to increase from 54 years today to 68 years by 2050 (Ext E) • only 6% over age 60 (Ext E) Analysis (1+1) Development of points made, must make reference to development not just growth (might be implicit) e.g. • higher literacy rates/life expectancy may mean higher productivity, greater employment opportunities • there are more people of working age relative to people who depend on them, so living standards will improve • smaller families will make it easier to borrow so there will be more investment to increase opportunity for firms to set up • falling birth rates mean savings are higher so there will be more opportunities to improve living standards	(8)

	Evaluation (2 marks for any relevant point, or two points 1 + 1): e.g. • the population is rising very rapidly • changes will be seen over time • higher working population now is a benefit, but there might be a demographic time bomb when this generation is over 60 • comments about the relative significance of the factors/combination of factors	
--	--	--

Question Number	Indicative content	Mark
(c)	Knowledge 2, Application 2, Analysis 4 Knowledge and analysis - more flowers with a lower average cost than another country Application - heating costs make Dutch flowers more expensive to produce despite lower transport costs to the UK - high altitude with cool nights - proximity to equator and sunlight hours - cheaper labour - end to seasonal production 365-day a year absolute advantage - application marks may be awarded on the diagram/table - Creates additional employment (100,000 directly and two million indirectly) Analysis Example of analysis:  Diagram showing outward shift in Kenya's PPF e.g.	(8)

Numerical analysis e.g.

Output, per unit of resources:	Flowers	Machinery
Kenya	100	25
Netherlands	25	100

Output, after specialisation:	Flowers	Machinery
Kenya	200	0
Netherlands	0	200

Leads to growth: this might be shown by an outward shift of the PPF, or use of output table, e.g.

Output, per unit of resources:	Flowers	Machinery
Kenya	100	100
Netherlands	100	100

NB for a Level 3 response there must be at least one valid diagram or numerical example clearly linked to costs absolute or comparative advantage (i.e. relative costs/opportunity costs)

Other analysis:

- countries can focus all of their production in one product and swap/trade it for a greater quantity of the other good.
- Kenya may benefit from economies of scale as they produce more
- enables larger exports and GDP
- example of before and after output and then gains from trade e.g. pre-trade 125F and 125M, after trade (full specialisation) 200F and 200M, so gains from trade = 75F and 75M

- terms of trade lie between opportunity cost ratios
- calculation of a suitable terms of trade e.g. $F=2M$, meaning Kenya can swap 200F for 400M

NB allow reference to comparative advantage also countries could have both absolute and comparative advantage. Allow diagrams/tables showing both concepts.

Knowledge, application and analysis		
Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	3–5	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	6–8	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
(c) continued	Evaluation 4 • limitations of the model e.g. immobility of factors/trade barriers, transport costs, more products/trade conflicts or dependence between countries in the world/can average costs be easily compared/are there constant returns to scale? • if energy costs change then the absolute advantage might be eroded • monopsony buyers e.g. supermarkets make a huge advantage and erode any benefits for Kenya • global health crisis has reduced international flights so costs have risen/no spare capacity on flights • other factors that could have a more significant impact on growth e.g. interest rates • only 1% of GDP so may not be that significant • short run/long run considerations e.g. in changing from one type of production to another	(4)

Evaluation		
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Indicative content	Mark
(d)	Knowledge 4, Application 4, Analysis 8, Evaluation 9 Microeconomic effects of decreasing interest rates • lower costs to businesses, so fixed costs fall and increase competitiveness. May be shown using a cost/revenue diagram • greater credit for businesses to expand/invest in R&D and gain dynamic efficiency • higher consumer demand as consumption increases; greater consumer surplus • impact on Kenya's housing market • Mr Matsiko in Ext G pays 22% not 7%, and there is a large information gap for lenders (asymmetry of information in credit markets) • labour market effects (derived demand) • lower prices for consumers • less available credit (so less investment, dynamic efficiency etc) Macroeconomic effects may include: • lower saving (unlikely in the context) but easier to borrow, so consumption and investment increases; hence AD rises with multiplier effects. May be shown using AD/AS analysis or diagram • lower exchange rates – improvement in current account position of BOP, with effects on competitiveness and trade • lower cost of financing public deficit/debt may mean greater government spending elsewhere • redistribution of income, e.g. from savers/lenders to borrowers • impact on LRAS/PPF over time if investment continues to grow NB for a Level 4 response, there must be micro and macro effect(s). Income distribution, investment changes and competitiveness, for example, can be used as either micro or macroeconomics. NB if there is no reference to a developing country then award a maximum of Level 3 KAA. NB Effects in KAA could be used as evaluation and vice-versa. Counter-effects may be used as evaluation.	(25)

	9 marks for evaluation – points might include: • interest rate is not the only cost for firms e.g. depends on how much the interest rate costs are as a percentage of costs overall • impact on real output depends on level of spare capacity/elasticity of LRAS/other components of AD • the central bank rate is not the rate that individuals can access • degree to which the factors might be a success • depends on other countries' interest rates are (relative competitiveness issue) • fixed interest rates and other short term/long term issues • interest rates are low in Kenya compared to other sub-Saharan countries • impact on borrowers will depend on whether people have assets or collateral • magnitude/pattern of the interest rate change	
--	---	--

Knowledge, application and analysis		
Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1 - 4	Displays ability to apply knowledge in context but will focus on small range of elements. Demonstrates understanding by identifying relevant information. Demonstrates knowledge and understanding of terms, concepts, theories and models.
Level 2	5 - 8	Shows ability to apply economic ideas and relate them to economic problems in context. Displays knowledge and understanding of economic principles, concepts and theories to make limited analysis or narrow analysis.
Level 3	9 - 12	Analysis is clear and coherent with evidence well integrated, although may focus on some of the broad elements of the question more than others. Shows ability to apply economic ideas and relate them directly to the broad elements in the question.
Level 4	13 - 16	Analysis is relevant, clear and coherent with evidence fully and reliably integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems covering both microeconomic and macroeconomic effects. A clear understanding of economic principles, concepts, theories and arguments.

Evaluation		
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–3	Identification of evaluative comments without explanation.
Level 2	4–6	Evaluative comments with limited explanations. Evidence of evaluation of alternative approaches which is generic or unbalanced leading to limited judgements.
Level 3	7–9	Evaluative comments supported by relevant reasoning and appropriate reference to the context. Evaluation recognises different viewpoints and is critical of the evidence provided and/or the assumptions underlying the analysis enabling informed judgements to be made.

Question Number	Indicative content	Mark
(e)	Knowledge 4, Application 4, Analysis 8, Evaluation 9 Microeconomic strategies may include: • state provision or tax relief to encourage increased job opportunities • other attempts to encourage private production e.g. flower firms benefit from airport improvements • methods to improve value of workers' output e.g. vocational training at school, or improving student attendance • disease prevention and cures e.g. polio vaccine • infrastructure • skills • technology • government intervention e.g. minimum wage or subsidies Macroeconomic strategies may include: • trade liberalisation e.g. promote international trade, e.g. absolute advantage means there are gains from international trade but currently 90% flowers are from the Netherlands • privatisation – the flower industry is private • information and health assistance to lower birth rate • development of human capital, e.g. better healthcare in other areas, spending on education and skills • increased FDI by shoring up capital markets • aid • debt relief • microfinance Accept standard government/international institution/NGO policies to promote macroeconomic stability or growth if linked to development e.g. fiscal policy aimed at reducing inequality	(25)

	NB for a Level 4 answer there must be reference to Kenyan data or another developing country NB many strategies such as vaccines, tourism, education/skills, privatisation, microfinance, supply side policies or infrastructure could be counted as macro or micro NB Counter-effects can be counted as strategies or evaluation 9 marks for evaluation – points might include: • There is a limit to what strategies can influence, e.g. health and education, if for example children are needed as a social insurance policy • Global health crisis has affected poor countries more profoundly • Comparison or contrast with another developing country or a more economically developed country e.g. as an example of how population growth can be limited
